PUBLICATION OFFICE: Prince & Lemon Sts., Lancaster, Pa. 17604.

EDITORIAL OFFICE: Washington, D. C. **P.O. ADDRESS:** Box 1736, Washington, D. C. 20013. Telephone LIncoln 6–6734.

ADMINISTRATIVE OFFICE: **American Meteorological Society,** Office of Executive Director, 45 Beacon Street, Boston, Mass. 02108.

Address all business communications, orders and inquiries to the Executive Director, Mr. Kenneth C. Spengler, 45 Beacon Street, Boston, Mass. 02108. Exchanges and reprints may be sent direct to P. O. Box 1736, Washington, D. C. 20013.

METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS is a monthly publication devoted to current abstracts in English on important meteorological and geoastrophysical literature in every language.

SUBSCRIPTION RATE: Government agencies and industrial, commercial, scientific and research organizations, $400.00. Educational institutions and public libraries, $200.00. Individuals (provided that the individual's organization subscribes at the appropriate rate): non AMS members $40.00; AMS members $30.00. Back volumes: Vol. 16, 1965 same as above. Vol. 1, 1950–Vol. 15, 1964, $50.00 per vol.; $10.00 per issue. Special price, Vols. 1–10 (1950–1959), complete set $200.00.

Cumulative Author and Subject Indexes

(Vol. 17, No. 1–12)

Jan.–Dec. 1966

(*For complete table of contents see back cover*)

Published monthly at Prince and Lemon Streets, Lancaster, Pa., by the American Meteorological Society, 45 Beacon Street, Boston, Mass. 02108.

Printed and issued by: Lancaster Press, Inc.

1127-1

ERRATA—VOLUME 17, 1966

Note: In the following list only more important errors are included. Discrepancies in style, punctuation, accents, capitalization, subject headings, etc., are not, as a rule, listed; nor are errors in the monthly indexes of each issue where these errors are corrected in this volume index. Errors of fact which have come to our attention, mistakes in spelling of the names of authors, and errors in title, journal entries or pagination are included. Any errors which have been overlooked should be called to our attention (by post card, addressed to: **Meteorological and Geoastrophysical Abstracts,** Box 1736, Washington, D. C. 20013).

1. p. 62, *item* 17.1–186, *line* 10, *change* Trubikov *to* Trubnikov.

2. p. 425, *item* 586, *line* 2, *insert* after title: Hydrology of New Zealand offshore waters. New Zealand. (Dept. of Scientific and . . .).

3. p. 488, *item* 17.3–24, *line* 1, *change* Osdakov *to* Osadkov.
p. 489, *item* 17.3–26, *line* 1, *change* Akademiia Nauk USSR *to* Akademiia Nauk URSR.
p. 497, *item* 17.3–45, *line* 1, *change* DN-HO *to* DAS.

4. p. 732, *item* 17.4–16, *line* 10, *change* Stickland, J. D. H. *to* Strickland, J. D. H.
p. 763, *item* 17.4–109, *line* 1, *change* Yuan, Djen *to* Yuan, Chen.
p. 813, *item* 17.4–266, *line* 1, *change* Kostianoĭ, G. Cn. *to* Kostianoĭ, G. N.
p. 853, *item* 17.4–398, *line* 1, *change* Aufdermauer *to* Aufdermaur.
p. 917, *item* 17.4–614, *line* 15, *change* 370–460 nm logarithms *to* 370–460 nm is 0.2 nm logarithms.
p. 920, *item* 17.4–624, *line* 2, *change* Carrer *to* Karrer; Also *line* 6 *change* E. K. Epik's *to* E. J. Öpik's.

5. p. 1075, *item* 17.5–299, *line* 1, *change* Slayter *to* Slatyer.
p. 1187, *item* 17.5–633, *lines* 6 and 8, *change* Smiland *to* Småland.
p. 1198, *item* 17.5–678, *line* 2, *change* Oct. *to* Oct. 1965.
p. 1203, *item* 17.5–697, *line* 4, *change* 30:4–16 *to* 30:3–6.

6. p. 1271, *item* 17.6–21, *line* 10, *change* Fiord oceanography *to* Fjord oceanography.
p. 1495, *item* 17.6–726, *line* 3, *change* 57:31–31 *to* 57:21–31.
p. 1501, *item* 17.6–744, *line* 9, *change* Fiord oceanography *to* Fjord oceanography.

7. p. 1570, *item* 17.7–54, *line* 2, *change* Feb. 1965 *to* Feb. 1966.
p. 1637, *item* 17.7–261, *line* 2, *change* cold systems *to* cloud systems.
p. 1665, *item* 17.7–345, *line* 1, *change* Mashkova, G. V. *to* Mashkova, G. B.
p. 1766, *item* 17.7–666, *line* 1, *change* Models of the trapped radiation *to* Models of the trapped radiation environment.
p. 1803, *item* 17.7–785, *line* 2, *change* 9(3):9–12 *to* 11(3):9–12.

8. Back cover, Table of Contents, *change* page number under Sec. D, last line "Satellites-Space Probes" from 2049 *to* 2036.

9. p. 2115, *item* 17.9–7, *line* 1, *change* Glasiologico *to* Glaciologico.
p. 2171, *item* 17.9–182, *line* 4, *change* instructions *to* intrusions.
p. 2194, *item* 17.9–253, *line* 11, *change* Hurricane "Dora" (1966) *to* Hurricane "Dora" (1964).
p. 2197, *item* 17.9–261, *lines* 2, 4 and 13, *change* East Africa *to* West Africa.
p. 2297, *item* 17.9–574, *line* 1, *change* Pokrovskiĭ, G. L. *to* Pokrovskiĭ, G. I.
p. 2323, *item* 17.9–662, *line* 5, *change* Trudy, 64:63–97 *to* Trudy, 64:63–79.

11. p. 2828, *item* 17.11–615, *line* 15, *change* Moon trail *to* Moon tail.

Wind Waves and Swell, 5(11), 1954

CUMULATIVE AUTHOR INDEX

Vol. 17, No. 1–12, Jan.–Dec. 1966

Note: In this index, author entries are arranged alphabetically and, under each author, the titles are likewise arranged alphabetically by the first word (other than an article) of the original title. The translated title is placed in brackets after foreign language titles, except for French, Italian, Spanish and Portuguese.

Authors whose names begin with an article or preposition (van, de, di, le, la, etc.) are generally indexed under that article or preposition. Cross references indicate variations from that practice, or possible alternate entries.

All titles are listed under the first author. Co-authors, if any, are mentioned after the title. This simplifies arrangement of titles under any given author.

Separate indexes are provided for contract reports (by contract, grant or project number) and for translations (by author).

A

agaard, K., *see* **Coachman, L. K.,** 17.5–742

anensen, C. J. M., *see* **Ritchie, W. G.,** 17.3–197

ngström, Anders
- Pyrheliometric measurements with special regard to the circumsolar sky radiation (*with* **Rodhe, Bertil**), 17.8–150
- Solar constant and the temperature of the Earth, 17.2–215
- Solar radiation measurements and the solar aureole, 17.5–91

arons, Jules
- Size of low-latitude ionospheric irregularities determined from the observations of discrete sources of different angular diameters (*with* **Guidice, Donald A.**), 17.11–509
- *See also* **Castelli, John P.,** 17.3–557; **Egeland, Alv,** 17.5–563; **Mullen, J. P.,** 17.6–585; 17.12–80

bakarov, M. I.
- Kolebanie ispareniia na poverkhnosti Kaspiĭskogo moria i obuslovlivaiushchie ego faktory [Fluctuation of evaporation from the surface of the Caspian Sea and factors causing it], 17.10–373

bal'ian, T. S.
- O roli razlichnykh vysotnykh zon v formirovanii stoka polovod'ia gornykh rek Sredneĭ Azii [Role of different altitude zones in the formation of mountain river floods in Central Asia], 17.1–679
- On tasks and investigations in mountain representative basins, 17.8–719

bbot, Charles Greeley
- Account of the Astrophysical Observatory of the Smithsonian Institution, 1904–1953, 17.12–44
- Forecasting from harmonic periods in precipitation, 17.12–176
- Precipitation at Nagpur, India [Comments by S. L. Chorghade], 17.7–399
- Solar constant, 17.1–252

Abbott, R. L., *see* **Westwater, E. R.,** 17.11–320

Abd el Rahman, A. A.
- Water output of the desert vegetation in the different microhabitats of Wadi Hoff (*with* **Batanouny, K. H.**), 17.6–374

Abdullah, Abdul Jabbar
- Head-on collision between two pressure jumps, 17.7–315
- "Musical" sound emitted by a tornado, 17.8–310
- Note on the "Square Cloud," 17.10–408
- Spiral bands of a hurricane: a possible dynamic explanation, 17.10–274

Abel, Robert B.
- Role of the private institution in oceanography, 17.5–651

Abelson, Philip H.
- Abiogenic synthesis in the Martian environment, 17.7–717

Abetti, Giorgio
- Sunspots from Galileo to Hale, 17.2–552

Abrahms, Gerald, *see* **Court, Arnold,** 17.6–177

Abramov, R. V.
- Sezonnye migratsii Islandskoĭ (Severo-Atlanticheskoĭ) depressii [Seasonal movements of the Icelandic (North-Atlantic) depression] [and Eng. transl.], 17.12–251

Abramova, M. M.
- Vlagopotreblenie i vodnyĭ rezhim viaza melkolistnogo na meliorirovannom solonchakovom solontse v usloviiakh polupustyni [Moisture consumption and water regime of the small-leaved elm on reclaimed saline solonetz soils under semidesert conditions] (*with* **Sudnitsyn, I. I.** and **Tsel'niker, Iu. L.**) [and Eng. transl.], 17.11–431

Abramovich, K. G.
- K kharakteristike atmosfernykh protsessov v dni s nizhneĭ oblachnost'iu [Character of atmospheric processes on days with low clouds], 17.7–386
- Nekotorye osobennosti raspredeleniia meteorologicheskikh elementov v nizhneĭ chasti troposfery v oblachnye i bezoblachnye dni [Some features of the meteorological element distribution in the lower troposphere on cloudy and clear days], 17.7–382

Abrashina, N. N.
- Dlinnye volny v neodnorodnoĭ zhidkosti ot periodicheskoĭ peremeshchaiushcheĭsia sistemy davleniĭ [Long waves in a heterogeneous fluid caused by a moving pressure system] [and Eng. transl.], 17.6–740

Abrosimov, A. T.
- Apparatura stsintilliatsionnykh schetchikov dlia issledovaniia kosmicheskikh lucheĭ [Scintillation counters for studying cosmic rays], 17.7–582
- Issledovanie korotkoperiodicheskikh i mikrovariatsiĭ intensivnosti kosmicheskikh lucheĭ pri pomoshchi odinochnykh stsintilliatsionnyhk schetchikov [Investigation of short-period and microvariations in cosmic ray intensity by means of individual scintillation counters] (*with* **Blokh, Ia. L.**), 17.3–466
- Issledovanie korotkoperiodicheskikh i mikrovariatsiĭ intensivnosti kosmicheskikh lucheĭ s pomoshch'iu novykh priborov [Study of short-period and microvariations of cosmic ray intensity by means of new instruments] (*with* **Blokh, Ia. L.**), 17.7–583
- Primenenie stsintilliatsionnykh schetchikov v detektorakh kosmicheskogo izlucheniia [Use of scintillation counters in cosmic radiation detectors] (*with* **Blokh, Ia. L.**), 17.7–584
- Zhidkie stsintilliatsionnye detektory bol'shikh razmerov [Liquid scintillation detectors of large size] (*with* **Blokh, Ia. L.** and **Pomanskiĭ, A. A.**), 17.7–585

Abuladze, N. B.
- K voprosu o nekotorykh parametrakh geomagnitnykh bur' tipa Sc [Some parameters of Sc type geomagnetic storms] (*with* **Khocholava, G. M.** and **Chikovani, D. S.**), 17.3–528

Abuziarov, Z. K.
- Metod rascheta poleĭ volneniia v severnoĭ chasti Atlanticheskogo okeana [Method of calculating fields of sea swell in the North Atlantic Ocean], 17.12–722
- Prognozy volneniia i rekomenduemye kursy [Forecasts of swell and recommended routes], 17.5–759

Academia Sinica. Inst. of Geophysics and Meteorology
- Some theoretical investigations and model experiments on the structure of radiation belts and its variation during a magnetic storm (*with* **Peking. Univ. Dept. of Geophysics**), 17.6–550

Acharya, U. R.
- Doppler navigator and its application to meteorological reconnaissance flights in India, 17.6–112

Acheson, Donald T.
- Lithium bromide dew cell, 17.3–94

Ackerman, Edward A.
- Economic analysis of weather: an idea weather pattern model, 17.11–205

Ackermann, William C.
- Committee on Status and Needs in Hydrology, 17.6–50

Adachi, Saburo
- Theory of duct propagation of whistler radio waves, 17.10–582

Adam, N. V.
- Opyt postroeniia geomagnitnoĭ karty po dannym ISZ [Construction of a geomagnetic map from satellite data] (*with* **Ben'kova, N. P.** and **Tiurmina, L. O.**) [and Eng. transl.], 17.12–588
- Spherical harmonic analysis of world magnetic charts for the 1960 epoch (*with others*) [Transl. from Russ.], 17.7–649

Adamenko, V. N.
- Mezhdunarodnyĭ simposium po issledovaniiu radiatsionnykh protsessov i zasedaniia komissiĭ MAMFA po radiatsii i dinamicheskoĭ meteorologii [International Symposium on the investigation of radiative processes and the meetings of the IAMAP committees on radiation and dynamic meteorology] (*with* **Vinnikov, K. Ia.**), 17.12–274

Adams, G. W.
- Theoretical study of cosmic noise absorption due to solar cosmic radiation (*with* **Masley, A. J.**), 17.11–578
- *See also* **Masley, A. J.**, 17.5–518

Adams, Harry E.
- Study of the chemistry of the Earth's upper atmosphere, 17.4–152

Adams, Roy N.
- Precautionary note on stratification (*with* **Denman, Eugene D.**), 17.11–257

Adams, W. P.
- Instruments and methods (*with* **Shaw, J. B.**), 17.11–749

Adámy, Erika (Koflanovits)
- Hőmérsékletváltozások és hőmézékleti anomáliák kapcsolatáról [Relation between temperature variations and temperature anomalies], 17.9–283
- Intenzív téli felmelegedések szinoptikus klimatológiai vizsgálata [Synoptic climatological study of intensive warmings in winter], 17.9–285
- Magyarországon a nyári északnyugati irányitottságú időjárási helyzetekben előforduló lehűlések vizsgálata [Decreases of temperature during northwestern weather situations in Hungary], 17.4–293

Preliminary observations of geomagnetic micropulsations with an array of magnetometers, 17.12–582
Chuter, I. H., *see* **Howkins, G. A.**, 17.3–146
Chyou, Yung-yen
Some empirical relations of the phase difference between the field of heat supplied by the ocean and the atmospheric large scale disturbances (*with* **Chen, Kuo-fan**), 17.4–219
Chytil, Bohumil
Distribution of duty cycle of duration of signal scattered on meteoric trails, 17.11–647
Ciaglic, Valerian
Evoluţia fenomenelor de îngheţ pe rîul Bistricioara în iarna 1963/1964 [Evolution of icing phenomena on the Bistricioara River during the winter 1963/1964], 17.2–667
Cialdea, R.
Ricerche di ottica e di spettroscopia nell'alta atmosfera, 17.1–183

Cicala, Aldo
Analisi e controllo delle condizioni meteorologiche col contributo dei dati Tiros, 17.7–137
Cícha, M., *see* **Bukva, A.**, 17.10–177
Circle, R. R., *see* **Powell, R. S.**, 17.11–674
Cîrnu, I., *see* **Berbecel, O.**, 17.6–67
Cladis, J. B., *see* **Imhof, W. L.**, 17.11–600
Clague, L. F.
Improved device for obtaining cloud droplet samples, 17.2–109
Clapp, Philip F.
Tropospheric heating and cooling for selected days and locations over the United States during winter 1960 and spring 1962 (*with* **Winninghoff, Francis J.**), 17.8–287
Clapperton, J. L.
Estimates of the contribution of solar radiation to the thermal exchanges of sheep at a latitude of 55° north (*with* **Joyce, J. P.** and **Blaxter, K. L.**), 17.6–278
Clarence, N. D.
Whistlers as a phenomenon to study space electricity, 17.4–574
Clarie, Albert, *see* **Larras, Jean**, 17.6–354
Clark, C., *see* **McKee, R.**, 17.12–519
Clark, Charles G.
Radar data acquisition techniques (*with* **Dooley, J. T.**), 17.2–66
Clark, D. D.
Meteorological rocket sonde, 17.3–61
Clark, Gilbert B.
Hurricane season of 1965, 17.8–307
Clark, James R., *see* **Nagle, Roland E.**, 17.1–351; 17.5–121
Clark, John B.
Pilot technique in turbulence, 17.12–330
Clark, John F.
Role of rockets, satellites and space probes in atmospheric electricity research, 17.6–464
Clarke, John F.
Evaluation of CO_2 measurements as an indicator of air pollution (*with* **Faoro, Robert B.**), 17.10–228
Clarke, R. H.
Horizontal mesoscale vortices in the atmosphere, 17.4–220
Oases in the ice [of the Antarctic Continent], 17.9–691
Turbulence and the detailed structure of a subtropical jet stream, 17.12–331
See also **Troup, A. J.**, 17.4–386

CUMULATIVE TRANSLATIONS INDEX

Vol. 17, Nos. 1–12, Jan.–Dec. 1966

Adam, N. V.
- Spherical harmonic analysis of world magnetic charts for the 1960 epoch (*with* others) [Transl. from Russ.], 17.7–649

Adrov, M. M.
- On the hydrological regime of the Central Height area of the Barents Sea [Transl. from Russ.], 17.3–668

Afanas'eva, V. B.
- On the relationship between snow cover and the G. Ia. Vangengeĭm types of circulation (*with* **Esakova, N. P.**) [Transl. from Russ.], 17.7–424

Afanas'eva, V. I.
- Short-period pulsations of the Earth's magnetic field [Transl. from Russ.], 17.5–538

Afonin, V. V.
- Brief survey of the results of physical experiments on the satellite "Kosmos-2" in the ionosphere (*with others*) [Transl. from Russ.], 17.10–482

Agenorov, V. K.
- Diurnal oscillations of radiant solar energy in the ocean in relation to its optical density [Transl. from Russ.], 17.3–651
- Seventh Atlantic expedition of the Marine Hydrophysical Institute (*with* **Martsinkevich, L. M.**) [Transl. from Russ.], 17.3–628

Aĭzenshtat, B. A.
- Heat balance of the basic regions of Central Asia, [Transl. from Russ.], 17.8–321

Akademiia Nauk SSSR. Institut Prikladnoĭ Geofiziki
- Investigation of the bottom 300-meter layer of the atmosphere [Transl. from Russ.], 17.4–10

Akademiia Nauk Ukrainskoĭ RSR, Kiev. Morskoĭ Gidrofizicheskiĭ Institut
- Hydrophysical investigations [of the] 7th voyage of the Mikhail Lomonosov [Transl. from Russ.], 17.4–18

Aleksandrova, A. K.
- Experiments on the spreading of precipitating admixture from a point source in the bottom layer of the atmosphere (*with* **Byzova, N. L.** and **Mashkova, G. B.**) [Transl. from Russ.], 17.7–206

Alekseev, F. A.
- Soviet advances in nuclear geophysics (ed.) [Transl. from Russ.], 17.4–4

Alekseev, V. G.
- On the analysis of the devices for measuring the time spectra of turbulent fluctuations [Transl. from Russ.], 17.3–307

Al'pert, Ia. L.
- Altitudinal-time distribution of the electron concentration and nonuniform formations of the outer ionosphere (*with* **Sinel'nikov, V. M.**) [Transl. from Russ.], 17.10–483
- Artificial satellites in a rarefied plasma (*with* **Gurevich, A. V.** and **Pitaevskiĭ, L. P.**) [Transl. from Russ.], 17.8–18
- Interaction of moving bodies with a plasma: introductory remarks [Transl. from Russ.], 17.11–64

Anan'ev, N. I.
- Effect of single-row green plantings on the microclimate in North Kazakhstan [Transl. from Russ.], 17.7–461

Andreev, I. D.
- Some characteristics of diurnal wind velocity variations at Novolazarevskaya station (*with* **Artem'ev, A. N.**) [Transl. from Russ.], 17.10–345

Anikin, Iu. A.
- Measurement of wind pressure over sea waves under natural conditions [Transl. from Russ.], 17.4–104

Antonov, R. A.
- Experimental data on the development of extensive air showers in the upper half of the atmosphere (*with* **Smorodin, Iu. A.** and **Tulinova, Z. I.**) [Transl. from Russ.], 17.3–467

Antonova, A. E.
- Formation of radiation zones as a result of particle drift in the depths of the magnetosphere (*with* **Ershkovich, A. I.** and **Shabanskiĭ, V. P.**) [Transl. from Russ.], 17.10–565

Antonova, L. A.
- Measurement of soft electron streams in the upper atmosphere at altitudes to 500 km (*with* **Kazachevskaia, T. V.**) [Transl. from Russ.], 17.10–566

Arsen'ev, V. S.
- Water circulation in the Bering Sea, 17.12–703

Badinov, I. Ia.
- Spectroscopic method of integral determination of the water vapor content in a column

of atmosphere [Transl. from Russ.], 17.3–120
Bagrov, N. A.
Statistical analysis of results of tests of methods for forecasting thunderstorms [Transl. from Russ.], 17.10–190
Baĭdal, M. Kh.
Circumstances and prospects of a composite macrocirculation method of long-range weather forecasts [Transl. from Russ.], 17.18–212
Bakanov, S. P.
On the theory of thermal precipitation of small aerosol particles (*with* **Deriagin, B. V.**) [Transl. from Russ.], 17.5–162
Balabanova, V. N.
Investigation of the dispersivity of the silver iodide aerosol (*with* **Zhigalovskaia, T. N.**), [Transl. from Russ.], 17.5–342
Silver iodide glaciation of supercooled fogs [Transl. from Russ.], 17.5–345
Baradzeĭ, L. T.
Passage of high-energy nucleons through the atmosphere and production of mesons (*with others*) [Transl. from Russ.], 17.3–468
Baranov, A. M.
Thickness of high clouds and the annual variation of the height of their tops [Transl. from Russ.], 17.5–374
Barsukov, O. M.
On the nonperpendicularity of the E and H variation vectors of the electromagnetic field of the Earth (*with* **Zybin, K. Iu**) [Transl. from Russ.], 17.5–539
Baryshev, V. A.
Dependence of the correlation between the results of observations of the Earth's thermal radiation on the properties of the instrument used [Transl. from Russ.], 17.2–92
Basilova, R. N.
Study of cosmic rays during flights of spacecrafts-satellites and the "Kosmos" AES (*with others*) [Transl. from Russ.], 17.10–523
Batalin, A. M.
Problems relating to the physics of the Pacific Basin: a review of research at the Far Eastern State University [Transl. from Russ.], 17.8–628
Batiaeva, T. F.
Weather and atmospheric circulation in the winter of 1962/63 (*with* **Minina, L. S.**) [Transl. from Russ.], 17.8–129
Bazelian, L. L.
Measurement of the fluxes of discrete sources of cosmic radio emission at frequencies below 40 mHz (*with others*) [Transl. from Russ.], 17.7–701
Bazhulin, P. A.
Angular and spectral radiation distribution of the Earth in the infrared spectral region (*with* **Kartashev, A. V.** and **Markov, M. N.**) [Transl. from Russ.], 17.10–311
Behannon, K. W.
Magnitnye buri nabliudavshiesia v magnitnom khvoste Zemli [Transl. from Eng.], 17.12–572
Belevich, R. R.
Vertical water motion in the north tropical and equatorial zones of the Pacific Ocean [Transl. from Russ.], 17.9–628
Beliaev, L. I.
Most probable value of chemical-spectral determinations of trace elements in sea water [Transl. from Russ.], 17.4–679
Beliaeva, I. P.
Calculation of the tangential stress of the wind for various types of thermal stratification [Transl. from Russ.], 17.8–653
Beliakov, Iu. M.
Determination of some parameters of internal waves in the Sargasso Sea by the autocorrelation method (*with* **Beliakova, O. M.**) [Transl. from Russ.], 17.3–683
Beliakova, O. M.
Some characteristics of the distribution of horizontal and vertical temperature gradients in the North Atlantic [Transl. from Russ.], 17.4–682
Belov, V. F.
Albedo of the underlying surface and of some forms of clouds in the region of the Antarctic slope and the Davis Sea [Transl. from Russ.], 17.10–304
Bemporad, A.
Search for a new empirical formula for the representation of the variation of the intensity of solar radiation with zenith angle [Transl. from German], 17.5–235
Benediktov, E. A.
Results of radio emission strength measurements at 725 and 1525 kc by equipment on the satellite "Elektron-2" (*with others*) [Transl. from Russ.], 17.11–620
Berbasov, F. I.
Characteristics of shortwave communication with spacecrafts (*with others*) [Transl. from Russ.], 17.10–48
Berdennikov, V. P.
Physical characteristics of the ice in ice jams and ice gorges [Transl. from Russ.], 17.12–735
Berliand, M. E.
Local forecasting of fog formation (*with* **Gracheva, V. P.** and **Fateeva, G. A.**), [Transl. from Russ.], 17.9–186
Numerical studies of atmospheric diffusion with normal and anomalous conditions of stratification [Transl. from Russ.], 17.7–331
Bezrukikh, V. V.
Outer region of the Earth's ionosphere (from 2000 to 200,000 km) (*with* **Gringauz, K. L.**) [Transl. from Russ.], 17.10–486

Possible existence of a soft electron component in the outer radiation zone and its variations (*with others*) [Transl. from Russ.], 17.10–550

Bibilashvili, N. Sh.
Theory of the formation of the large-droplet fraction in cumulus congestus and cumulonimbus clouds and modification of the formation processes (*with others*) [Transl. from Russ.], 17.5–339

Blinova, E. N.
Long range hydrodynamic weather forecasting [Transl. from Russ.], 17.2–9
Theory of hydrodynamic climate and long range weather forecasting [Transl. from Russ.], 17.2–140

Blokh, Ia. L.
Results derived from studying the cosmic ray nuclear component on the satellite "Elektron-2" (*with others*) [Transl. from Russ.], 17.10–525

Bobkov, V. G.
Radiation safety during space flights (*with others*) [Transl. from Russ.], 17.11–6

Bobrov, V. N.
Three-component magnetic variations station "Izmiran-1" [Transl. from Russ.], 17.7–616

Bogdanov, K. T.
Numerical solution of tide hydrodynamic equations by means of BESM-2 electronic computer for the Pacific area [Transl. from Russ.], 17.1–644

Bogdanova, E. G.
Relationship of readings of the Tret'yakov precipitation gage to wind speed [Transl. from Russ.], 17.9–321

Boĭko, A. P.
Hydrodynamic forecasting of pressure fields at mean atmospheric level for the whole globe taking orography into consideration [Transl. from Russ.], 17.1–128

Boĭko, P. N.
Atmospheric transparency at Aswan (Southern Egypt) and in some parts of the U.S.S.R. (*with* **Kazachevskiĭ, V. M.**) [Transl. from Russ.], 17.1–265
Effect of the surface on the polarization of diffuse sky light [Transl. from Russ.], 17.1–426

Boldyrev, V. G.
Calculation of the transmission functions of the atmosphere in the 8–12 μ region of the spectrum for the Northern Hemisphere [Transl. from Russ.], 17.3–284
On the role of vertical temperature and humidity profiles in the determination of the Earth's surface temperature from outgoing radiation (*with* **Koprova, L. I.** and **Malkevich, M. S.**) [Transl. from Russ.], 17.3–50

Boliunova, A. D.
Preliminary results derived from corpuscle investigations on the satellite "Elektron-1" (*with others*) [Transl. from Russ.], 17.10–551

Bondarenko, A. L.
Problem concerning the recording of periodic and non-periodic sea level oscillations with a tide gage [Transl. from Russ.], 17.4–671

Borisenkov, E P..
Energy transformation in the atmosphere of the Northern and Southern Hemispheres and interaction of processes in both Hemispheres [Transl. from Russ.], 17.4–209

Borisov, Anatoliĭ Aleksandrovich
Climates of the U.S.S.R. [Transl. from Russ.], 17.12–18

Borovenko, E. V.
Estimation of the effect of the 300-meter meteorological mast structure on the wind-gauge readings (*with others*) [Transl. from Russ.], 17.7–150

Borovikov, A. M.
Some results of radar observations of the development of Cu cong clouds in the results of modification (*with* **Kostarev, V. V.** and **Shupiatskiĭ, A. B.**) [Transl. from Russ.], 17.12–183

Bozhevikov, N. S.
On the relationship between height of cloud base and visibility distance at ground level [Transl. from Russ.], 17.7–398

Bozhkov, R. D.
Vertical ozone distribution in the Earth's atmosphere [Transl. from Russ.], 17.10–223

Bragin, Iu. A.
Measurement of atmospheric density at heights at 50–70 km [Transl. from Russ.], 17.2–150

Bramson, M. A.
Emissive power of water in the infrared region of the spectrum (*with* **Zel'manovich, I. L.** and **Kuleshova, G. I.**) [Transl. from Russ.], 17.2–220

Bronshten, V. A.
Problems of motion of large meteoritic bodies in the atmosphere [Transl. from Russ.], 17.11–252

Bruevich, S. V.
Salt composition of ocean and sea water and its variations in the course of time [Transl. from Russ.], 17.8–669

Brylev, G. B.
Joint radar and aerological observations in the lower 1.5 km of the atmosphere (*with others*) [Transl. from Russ.], 17.9–108
Maximum range of radar detection of showers (*with* **Sal'man, E. M.**) [Transl. from Russ.], 17.9–109

Bubnov, V. A.
Distribution of water masses in the Atlantic Ocean on a profile along the 30°W meridian (*with* **Kosarev, A. N.**) [Transl. from Russ.], 17.4–683

Buchinskiĭ, I. E.
On the tendency of modern climate fluctuations [Transl. from Russ.], 17.10–323
Budyko, M. I.
On the theory of evaporation in the presence of vegetative cover (*with* **Gandin, L. S.**) [Transl. from Russ.], 17.9–338
Polar ice and climate [Transl. from Russ.], 17.10–321
Bugaev, V. A.
Value of temperature correction in the computation of the 700-mb geopotential surface [Transl. from Russ.], 17.5–68
Burkov, V. A.
Machine processing of oceanographic characteristics (*with* **Tsipis, Ia. L.**) [Transl. from Russ.], 17.1–588
Byzova, N. L.
Some measurement findings on the horizontal diffusion of admixture in the bottom atmospheric layer [Transl. from Russ.], 17.7–207

Chantladze, Z. I.
Hydrochemical features of the formation of local runoff under conditions of mountain catchments of Georgia [Transl. from Russ.], 17.12–740
Chao, Chiu-Chang
Physics of the upper atmosphere [Transl. from Chinese], 17.12–207
Charakhch'ian, A. N.
Cosmic ray generation on the Sun (*with* **Charakhch'ian, T. N.**) [Transl. from Russ.], 17.10–527
Chechkin, S. A.
Temperature regime of swamps [Transl. from Russ.], 17.10–726
Chekirda, A. Z.
Forecasting the heights of the isobaric surfaces of the mean level of the atmospheric using the real profile of the zonal flow velocity [Transl. from Russ.], 17.4–139
Chekotillo, K. A.
Rate of vertical transport of water in the ocean [Transl. from Russ.], 17.1–619
Chemerenko, E. P.
Estimating the hydrological regime of the Kuibyshev Reservoir with the aid of electronic computers [Transl. from Russ.], 17.4–713
Cherepanov, N. V.
Structure of sea ice of great thickness [Transl. from Russ.], 17.10–720
Cherkesov, L. V.
Development of surface waves under the effect of variable pressure [Transl. from Russ.], 17.1–650
Chernaia, T. M.
Comparative evaluation of graphical methods of separation of ground water components of stream-flow hydrographs [Transl. from Russ.], 17.4–719
Chernysheva, O. N.
Geographical distribution of jet streams using maximum wind charts (*with others*) [Transl. from Russ.], 17.8–385
Chirkov, N. P.
11-year variations in the intensity of cosmic rays (*with* **Filippov, V. A.** and **Shafer, G. V.**) [Transl. from Russ.], 17.4–520
Chudakov, A. E.
Search for photons with energy $\sim 10^{13}$ eV due to local sources of cosmic radio emission (*with others*) [Transl. from Russ.], 17.3–475
Chudnovskiĭ, A. F.
Instrument for determining integral and mean values of certain meteorological elements (*with* **Mogilevskiĭ, B. M.**) [Transl. from Russ.], 17.8–91

Danilevskii, A. S.
Photoperiodism and seasonal development of insects [Transl. from Russ.], 17.11–9
Danilov, A. A.
Results of a study of the quantity γ_{eff} in the differential π-meson production spectrum (*with* **Krymskiĭ, G. F.** and **Filippov, V. A.**), [Transl. from Russ.], 17.4–521
Danilov, A. D.
Composition of the atmosphere in the 100–200 km region [Transl. from Russ.], 17.11–253
Ion formation in the ionosphere [Transl. from Russ.], 17.2–373
Radioastronomical studies and the ionosphere of Venus [Transl. from Russ.], 17.9–561
Davydov, S. A.
Contamination of the atmospheric air with the waste of ore-concentrating works (*with others*) [Transl. from Russ.], 17.8–230
Dekhtiar, M. I.
Fluctuations of the large-droplet count in stratiform clouds (*with* **Buĭkov, M. V.**), [Transl. from Russ.], 17.7–374
D'iachenko, L. N.
Distribution of effective radiation throughout the U.S.S.R. [Transl. from Russ.], 17.2–22
D'iachenko, P. V.
On the mechanism of horizontal entrainment and its possible role in the development of cumulus and cumulonimbus clouds [Transl. from Russ.], 17.10–256
D'iakonov, K. N.
Landscape studies in areas of influence of reservoirs [Transl. from Russ.], 17.6–449
Local climate of the Rybinsk Reservoir (*with* **Reteium, A. Iu.**) [Transl. from Russ.], 17.6–450
Didichenko, E. I.
Results of spectrophotometric observations of Mars during 1960–1961 (*with* **Koval', I. K.** and **Morozhenko, A. V.**) [Transl. from Russ.], 17.1–543

Dikiĭ, L. A.
  Frequencies of free atmospheric oscillations [Transl. from Russ.], 17.1–213
Diubiuk, A. F.
  Field study of clouds of the Crimean Black Sea coast, 17.9–359
Divari, N. B.
  Distribution of twilight sky luminance in the solar vertical [Transl. from Russ.], 17.1–420
Dolgin, I. M.
  Air temperature variations over Mirny (*with* **Sokolov, S. I.**) [Transl. from Russ.], 17.10–331
  Nacreous clouds in polar lands (*with* **Karimova, G. U.**) [Transl. from Russ.], 17.11–471
Dolginov, Sh. Sh.
  Experiments under the program of the World Magnetic Survey (*with others*) [Transl. from Russ.], 17.10–549
  Investigation of the Earth's magnetosphere in the radiation zone region (3-6R_e), Feb.–April 1964 (*with* **Eroshenko, E. G.** and **Zhuzgov, L. N.**) [Transl. from Russ.], 17.10–567
Dorman, L. I.
  Anisotropy of cosmic rays caused by the electric field of a corpuscular stream [Transl. from Russ.], 17.4–522
  Diurnal variations of cosmic rays caused by anisotropic scattering of particles by inhomogeneous magnetic fields of corpuscular streams [Transl. from Russ.], 17.4–523
  Variations of cosmic ray intensity during the period when the Earth is captured by corpuscular streams carrying homogeneous and inhomogeneous frozen magnetic fields [Transl. from Russ.], 17.4–524
Dovger, V. I.
  Backscattering of radio waves by aurorae [Transl. from Russ.], 17.5–497
Dovzhenko, O. I.
  Radiation units of length and critical energies (*with* **Pomanskiĭ, A. A.**) [Transl. from Russ.], 17.3–479
Driving, A. Ia.
  Some data on clouds in the stratosphere [Transl. from Russ.], 17.10–403
Drozdov, Oleg A.
  Moisture exchange in the atmosphere (*with* **Grigor'eva, A. S.**) [Transl. from Russ.], 17.10–12
Drozdova, V. M.
  Chemical composition of atmospheric precipitation according to investigations during the IGY and IGC (*with* **Petrenchuk, O. P.** and **Selezneva, E. S.**) [Transl. from Russ.], 17.8–428
Dubentsov, V. R.
  On certain special features of circulation in the troposphere and stratosphere near the equator, [Transl. from Russ.], 17.9–324
Dubina, R. B.
  Automatic input and oceanographic processing by the "Ural-22' computer (*with* **Nikolaev, Iu. V.**) [Transl. from Russ.], 17.1–591
Dubov, A. S.
  Spectral density of vertical wind gusts in clouds (*with* **German, M. A.**) [Transl. from Russ.], 17.3–333
Dubov, E. E.
  Balance of energy and structure of the chromosphere [Transl. from Russ.], 17.12–665
Dubrovin, L. I.
  Brine in the Lazarev ice shelf [Transl. from Russ.], 17.5–771
Dubrovskiĭ, V. G.
  Rapid geoelectrical and geomagnetic variations and their regularities, according to observations in Ashkhabad [Transl. from Russ.], 17.5–540
Dunskiĭ, V. F.
  Inertial settling of a coarsely dispersed aerosol on vegetation [Transl. from Russ.], 17.2–160
Dvali, E. R.
  Electric field in various cloud and precipitations [Transl. from Russ.], 17.6–467
Dvas, V. S.
  Analysis of the errors and techniques of measuring dew point [Transl. from Russ.], 17.8–94

Efimov, Iu. E.
  Measurement of the neutron flux in the atmosphere by the indium activation method (*with* **Romanov, A. M.**) [Transl. from Russ.], 17.12–555
Eroshenko, E. G.
  Study of the Earth's magnetosphere at a distance of 7–11.7 R_e in the "Elektron" satellites [Transl. from Russ.], 17.10–568
Ershkovich, A. I.
  Spectrum of electrons of very high energy produced in β decay of albedo neutrons [Transl. from Russ.], 17.1–507
Erukhimov, L. M.
  Ionosphere studies by receiving AES radio emission on the Earth (*with* **Mitiakov, N. A.** and **Mitiakova, E. E.**) [Transl. from Russ.], 17.10–490
Eskin, F. I.
  New method of positioning a Graafen tide gage from a vessel with high sides [Transl. from Russ.], 17.8–643
Eskin, L. I.
  Current in Lützow-Holm Bay [Transl. from Russ.], 17.5–743
  Development of shore ice in the Antarctica [Transl. from Russ.], 17.5–774
Evlashin, L. S.
  Morphology of hydrogen emission in polar aurorae [Transl. from Russ.], 17.4–505

Fatkullin, M. N.
Integral conductivities of the upper atmosphere [Transl. from Russ.], 17.2–355

Fedchenko, K. K.
Relationship of the cosmic ray intensity to solar activity [Transl. from Russ.], 17.4–525

Fedorov, K. N.
Equatorial Seiches [Transl. from Russ.], 17.8–705

Fedorov, N. N.
Investigation of the regularities of pulsating velocities in a stream with ice cover, from observational data of the GGI for the river Svir' (*with* **Sharshukova, N. P.**) [Transl. from Russ.], 17.3–713

Fedorov, S. F.
Evaporation from forest and field in years with different amounts of moisture [Transl. from Russ.], 17.12–388

Fedorova, V. N.
Selection of a formula to calculate the velocity of sound for automatic processing of deep-water hydrologic observations (*with* **Nedoshivin, O. A.**) [Transl. from Russ.], 17.8–649

Feĭgel'son, E. M.
Interaction between scattered and reflected light in daytime sky [Transl. from Russ.], 17.1–266
Time variation of temperature in stratus clouds [Transl. from Russ.], 17.10–404

Fel'zenbaum, A. I.
Dependence of wind coefficients in the Arctic on wind speed and ice thickness [Transl. from Russ.], 17.11–342

Feoktistov, K. P.
Results derived from optical observations with the spacecraft "Voskhod" (*with others*) [Transl. from Russ.], 17.10–49

Fesenkov, V. G.
Meteoric matter in interplanetary space, [Transl. from Russ.], 17.2–534
Significance of atmospheric optics in astrophysics [Transl. from Russ.], 17.1–414
Twilight method in the study of the optical properties of the atmosphere [Transl. from Russ.], 17.1–72

Filippov, A. Kh.
Atmospheric electric field during pre-thunderstorm and thunderstorm periods in Irkutsk [Transl. from Russ.], 17.6–468

Filippov, B. A.
International hydrological survey of the Baltic Sea [Transl. from Russ.], 17.10–665

Filippova, A. K.
Results of soil moisture surveys on catchments [Transl. from Russ.], 17.1–386

Fishkova, L. M.
OH emission according to observations at Abastumani (*with* **Markova, G. V.**) [Transl. from Russ.], 17.5–503

Fomin, Luch M.
Stationary wind-driven currents in the nonhomogeneous ocean of variable depth [Transl. from Russ.], 17.1–631

Formozov, A. N.
Snow cover as an integral factor of the environment and its importance in the ecology of mammals and birds [Transl. from Russ.], 17.3–20

Fuks, V. R.
Causes of variations in tidal current characteristics with depth (*with* **Bogdanov, K. T.**) [Transl. from Russ.], 17.8–706

Furuhate, M.
Measurement of the atmospheric light layer by means of a rocket (*with others*) [Transl. from Japanese], 17.1–82

Gaevskiĭ, V. L.
Profile of long-wave radiant fluxes in clouds [Transl. from Russ.], 17.5–252

Gaĭgerov, Semen Semonovich
Aerology in the Polar Regions [Transl. from Russ.], 17.8–25

Galin, M. B.
Forecasting zonal circulation using covariances [Transl. from Russ.], 17.2–141

Gal'perin, B. M.
Scattered and total solar radiation under various conditions (*with* **Seriakova, L. P.**) [Transl. from Russ.], 17.2–213

Gal'perin, Iu. I.
Physical picture of the formation of an artificial radiation zone during the high-altitude American thermonuclear explosion on July 9, 1962 [Transl. from Russ.], 17.11–566
Recording of the effects of the high-level thermonuclear explosion of July 9, 1962 by the satellite Kosmos 5 (*with* **Boliunova, A. D.**) [Transl. from Russ.], 17.1–512

Gamutilov, A. E.
Hydrological conditions in the Sargasso Sea and the neighboring part of the Gulf Stream (*with* **Istoshin, Iu. V.**) [Transl. from Russ.], 17.3–627
Zonality in the distribution of hydrological characteristics in the Atlantic Ocean (*with* **Gruzinov, V. M.**) [Transl. from Russ.], 17.3–626

Gandin, Lev Semenovich
Objective analysis of meteorological fields [Transl. from Russ.], 17.10–9

Gashina, S. B.
Special features of the radar characteristics of thunderstorm clouds (*with* **Sal'man, E. M.**) [Transl. from Russ.], 17.10–283

Gavrilov, V. A.
On the determination of landing visibility on aerodromes (*with* **Goryshin, V. I.**) [Transl. from Russ.], 17.7–469

Gdalevich, G. L.
Electric fields in the ionosphere based on

data from direct measurements on geophysical rockets (*with* **Imianitov, I. M.**) [Transl. from Russ.], 17.11–527

Gerasimova, V. M.
Particle-number fluctuations in an electron-photon shower [Transl. from Russ.], 17.3–482

Gezentsveĭ, A. N.
Orders of magnitude of oceanological characteristics [Transl. from Russ.], 17.8–637

Ginzburg, V. L.
Problems of and prospects for primary cosmic ray research (*with others*) [Transl. from Russ.], 17.10–530

Glinskiĭ, N. T.
Graphical computation of the depth of immersion of thermal depth meters (deep sea unprotected reversing thermometers) [Transl. from Russ.], 17.5–702

Glokova, E. S.
Diurnal variations of the hard component of cosmic rays near the minimum of solar activity [Transl. from Russ.], 17.4–528

Gol'berg, M. A.
Image blurring in observations of distant objects (*with* **Grishchenko, Z. I.**), [Transl. from Russ.], 17.1–410

Golovin, A. M.
Kinetics of cloud droplets in a model of stationary axisymmetrical cumulus clouds [Transl. from Russ.], 17.3–347

Gorbunov, Iu. V.
Short range forecast of hydrograph of high water of the Volga River at the City of Gor'ki by electronic analog computer [Transl. from Russ.], 17.8–738

Gorbunova, G. S.
Optical properties and photosynthesis of certain species of cultivated and wild plants in relation to ecological conditions (*with* **Parshina, Z. S.** and **Bedenko, V. P.**) [Transl. from Russ.], 17.11–634

Gorelik, A. G.
Coordinate-Doppler method of wind observation (*with* **Kostarev, V. V.** and **Chernikov, A. A.**) [Transl. from Russ.], 17.9–94
Coordinate-Doppler method of wind observations and some results of investigation of wind field heterogeneities in atmosphere (*with* **Kostarev, V. V.** and **Chernikov, A. A.**) [Transl. from Russ.], 17.10–92
Relationship between radar echo intensity and random motions of cloud particles [Transl. from Russ.], 17.5–352
Some problems of radar tracking of multiple targets (*with* **Chernikov, A. A.**) [Transl. from Russ.], 17.7–118
Some results of radar investigation of wind field structure at heights of 50 to 700 meters (*with* **Chernikov, A. A.**) [Transl. from Russ.], 17.11–142

Gorozhankin, B. N.
Results of ionosphere research by rockets and satellites in 1960–1964 (*with* **Rudakov, V. A.**) [Transl. from Russ.], 17.10–491

Gracheva, V. P.
On the stability of the wind direction in the surface layer of the atmosphere (*with* **Lozhkina, V. P.**) [Transl. from Russ.], 17.7–338

Graff, Kasimir
Formulae and auxiliary tables for the reduction of lunar observations [Transl. from German], 17.9–556

Grigorash, Z. K.
Propagation of tsunamis in the Black Sea in 1927 [Transl. from Russ.], 17.1–643

Grigor'eva, K. V.
Studies on pollution of atmospheric air with maleic anhydride [Transl. from Russ.], 17.10–230

Grigor'eva, L. K.
Example of computation of volumes of flood runoff from small catchments [Transl. from Russ.], 17.3–724

Grigorov, N. L.
Airplane measurements of slow cosmic-ray neutrons (*with* **Sokolov, V. D.** and **Liutenko, V. F.**) [Transl. from Russ.], 17.4–529
Problems and perspectives in cosmic ray research (*with others*) [Transl. from Russ.], 17.1–483

Gringauz, K. I.
Comparison of simultaneous measurements of the magnetic field and positive ion streams within the Earth's magnetosphere, performed on the satellite "Elektron-22" (*with others*) [Transl. from Russ.], 17.10–569
Outermost zone of charged particles (*with* **Khokhlov, M. Z.**) [Transl. from Russ.], 17.10–552
Satellite observations (Elektron-2) of the relation between magnetic field variations and positive ion fluxes within the magnetosphere (*with others*) [Transl. from Russ.], 17.2–492

Grishchenko, D. L.
Actinometric observation techniques at sea (*with* **Novosel'tsev, E. P.** and **Ter-Markariants, N. E.**) [Transl. from Russ.], 17.2–94

Grushevskiĭ M. S.
Some problems of unsteady movement of water in natural channels and bodies of water [Transl. from Russ.], 17.4–717

Gruzinov, V. M.
Computation of depth corrections for the deviation of the actual from the computed sound velocity during echo soundings [Transl. from Russ.], 17.5–709
Note on the dynamic description of the subpolar front in the North Atlantic (*with* **Chetkotillo, K. A.**) [Transl. from Russ.], 17.1–620

Gubanova, S. I.
Effective distribution of aerological stations in the Northern Hemisphere [Transl. from Russ.], 17.10–101

Gudkovich, Z. M.
Some important features of the formation of water density anomalies and their effect on ice and hydrological conditions in the Arctic basin and marginal seas (*with* **Nikiforov, E. G.**) [Transl. from Russ.], 17.7–769
Study of the nature of water circulation in the Arctic Basin using a model (*with* **Nikiforov, E. G.**) [Transl. from Russ.], 17.8–690

Guiraud, Jean-Pierre
Theoretical study of the propagation of sound-application to anticipation of the sonic boom produced by supersonic flight [Transl. from French], 17.8–27

Guniia, S. U.
Effect of mountain ranges on the formation and development of thunderstorms [Transl. from Russ.], 17.6–268

Gurevich, A. V.
Braking of bodies moving in a rarefied plasma (*with* **Moskalenko, A. M.**) [Transl. from Russ.], 17.11–65

Gurevich, L. E.
Magnetic field of sunspots, Pt. 2 (*with* **Lebedinskiĭ, A. I.**) [Transl. from Russ.], 17.1–567

Gurtovenko, E. A.
On the emission fringe of hydrogen filaments (*with* **Rakhubovskiĭ, A. S.**) [Transl. from Russ.], 17.1–572

Gurvich, A. S.
Pulsation spectra of the vertical component of wind velocity and their relations to the micrometeorological conditions [Transl. from Russ.], 17.10–344

Hachenberg, O.
Radio observations of the total solar eclipse of 15 February 1961 (*with others*) [Transl. from German], 17.1–530

Iakusheva, E. B.
Accounting for losses to evaporation and regulation of the flow in estimating underground feeding of rivers in the Zavolzh'e [Transl. from Russ.], 17.10–378

Ignatavičiene, I. A.
Certain special features of the atmospheric circulation in the Baltic Region [Transl. from Russ.], 17.8–298

Ignatova, R. V.
Effectiveness and reliability of radar observations of non-precipitating clouds (*with* **Petrushevskiĭ, V. A.**), [Transl. from Russ.], 17.7–119
Radar echo characteristics of clouds (*with* **Petrushevskiĭ, V. A.** and **Sal'man, E. M.**) [Transl. from Russ.], 17.7–120

Il'in, A. V.
Geomorphological investigations in the North Atlantic on the research vessel *Mikhail Lomonosov* [Transl. from Russ.], 17.2–587

Imianitov, I. M.
Electrical structure of thick convective clouds (Cu cong) and its relation to motions of air in clouds [Transl. from Russ.], 17.5–461
Structure and origin of the atmospheric electric field (*with* **Chubarina, E. V.**) [Transl. from Russ.], 17.6–466

International Geophysical Year, 1957/1958. IGY World Data Center B1, Moscow
Bibliography U.S.S.R., IGY World Data Center B1 [Transl. from Russ.], 17.7–67

Isaev, S. I.
Investigation of the polar aurorae, geomagnetic disturbances, and the ionosphere at high latitudes (*ed.*) [Transl. from Russ.], 17.8–516

Isaeva, L. S.
Determination of vertical eddy diffusivity in the upper layer of the Black Sea by a direct method (*with* **Isaev, I. L.**) [Transl. from Russ.], 17.3–664
Horizontal eddy diffusion in the sea (*with* **Isaev, I. L.**) [Transl. from Russ.], 17.3–665
One of the methods of determining vertical eddy diffusivity in the sea (*with* **Isaev, I. L.**) [Transl. from Russ.], 17.4–667

Ishkov, A. K.
Forecast of stages in the reach below the Gor'ki HES by means of an analog machine [Transl. from Russ.], 17.8–730

Istomin, V. G.
Composition of the outer ionosphere of the Earth based on measurement data from the "electron" satellites [Transl. from Russ.], 17.10–494

Istoshin, Iu. V.
Seasonal water temperature and salinity variations in the North Atlantic (*with* **Zaklinskiĭ, A. B.** and **Aksenov, D. A.**) [Transl. from Russ.], 17.4–686

Itokawa, Hideo
Development of sounding rockets in Japan (*with others*) [Transl. from Japanese], 17.8–28
Survey of Japanese space program with emphasis on Kappa and Lambda type observation rockets (*with others*) [Transl. from Jap.], 17.1–22

Iudin, M. I.
Application of statistical methods to investigation of the finite difference structure of the balance equation (*with* **Vulis, I. L.**) [Transl. from Russ.], 17.1–207

Iunusov, G. R.
On the modification of river flow and of the water balance [Transl. from Russ.], 17.2–677
Ivanov, A. A.
Determination of wave elements from the photographic record of a photographic slit wave meter during a wave survey from a moving ship (*with* **Tiuflin, Iu. S.**) [Transl. from Russ.], 17.5–696
Wave survey with a slit wave meter from a vertical base as a particular case of stereophotography (*with* **Tiuflin, Iu. S.**) [Transl. from Russ.], 17.5–697
Ivanov, Iu. A.
Role of boundary conditions and advection in the formation and depth distribution of extreme values of oceanological characteristics [Transl. from Russ.], 17.8–684
Ivanov, R. N.
Determination of the velocity of bottom currents with a stationary recorder [Transl. from Russ.], 17.4–672
Development of a wind-driven current [Transl. from Russ.], 17.5–752
Ivanov, V. N.
Experimental determination of statistical moments (*with* **Popova, A. G.**) [Transl. from Russ.], 17.7–110
Investigation of atmospheric turbulence by means of the M-27 bridled-cup anemometer [Transl. from Russ.], 17.7–151
On certain characteristics of the wind field in the lower 300-M layer of the atmosphere (*with* **Klinov, F. Ia.**) [Transl. from Russ.], 17.12–324
Statistical characteristics of turbulent diffusion and their estimation in the bottom layer of the atmosphere [Transl. from Russ.], 17.7–334
Ivanova, M. A.
Distribution of sound velocities in the North Atlantic in autumn and spring [Transl. from Russ.], 17.3–649
Ivanova, N. M.
Methods of measurement of the ion spectrum on the upper-air [i.e., tall] mast (*with* **Kuklina, G. M.** and **Sedunov, Iu.**) [Transl. from Russ.], 17.7–488
Ivanovskiĭ, A. I.
Aerodynamics of manometers and mass spectrometers carried on rockets and satellites [Transl. from Russ.], 17.10–124

Jaccard, Claude
Experimental and theoretical study of the electrical properties of ice [Transl. from German], 17.11–752

Kabanov, M. N.
Role of diffuse scattering in atmospheric transparency measurements [Transl. from Russ.], 17.1–268
Kadyrov, V.
Effect of river discharge on the chemical composition of shore-zone water of Lake Issyk-Kul' [Transl. from Russ.], 17.9–709
Kagan, B. A.
On the theory of thermodynamic interaction between sea and atmosphere (*with* **Utina, Z. M.**) [Transl. from Russ.], 17.5–178
Kagan, V. K.
Computing the spectral distribution of the brightness of the cloudless sky in a two-parameter model of the atmosphere (*with* **Riabova, E. P.**) [Transl. from Russ.], 17.4–280
Kalinin, G. P.
Numerical experiments in hydrology (*with* **Kuchment, L. S.** and **Koren', V. I.**) [Transl. from Russ.], 17.4–709
Kalinin, Iu. D.
Structure of the solar corpuscular stream and its interaction with the magnetosphere of the Earth (*with* **Mogilevskiĭ, E. I.**) [Transl. from Russ.], 17.10–580
Kamaldina, I. I.
Detection of near atmospheric disturbances and weather conditions [Transl. from Russ.], 17.5–464
Kaminskiĭ, S. T.
Seasonal Black Sea level variations [Transl. from Russ.], 17.5–706
Karavaeva, V. I.
Volumes of the main water masses in the Northern Pacific (*with* **Radzikovskaia, M. A.**) [Transl. from Russ.], 17.7–777
Karimov, M. G.
Luminance of solar aureoles near the Sun [Transl. from Russ.], 17.1–423
Karnaushenko, N. N.
Neutral buoyancy float for measuring currents from a large research ship [Transl. from Russ.], 17.5–689
Optimum parameters of deep-floating current meters [Transl. from Russ.], 17.5–690
Kasatkina, O. I. (Golikova)
Cuvette for nephelometric measurements with high angular resolution in the region 5 to 175° [Transl. from Russ.], 17.3–114
Kashina, V. I.
Dust content of the atmospheric surface layer in desert and semidesert regions of Central Asia and Kazakhstan [Transl. from Russ.], 17.1–169
Kazakov, S. P.
Motion of a hydrometric float [Transl. from Russ.], 17.5–673
Kazachevskaia, T. V.
Rocket data on the behavior of electron concentration in the ionosphere at altitudes of 100–300 km (*with* **Ivanov-Kholodnyĭ, G. S.**) [Transl. from Russ.], 17.10–496
Kazhdan, R. M.
Some results of calculation of the radiational variation of temperature in the atmospheric

boundary layer (*with* **Shekhter, F. N.**) [Transl. from Russ.], 17.7–211

Kebuladze, V. V.

On certain regularities of the disturbed field of Earth currents [Transl. from Russ.], 17.5–524

Khanaĭchenko, N. K.

System of equatorial countercurrents in the Atlantic Ocean (*with* **Khlystov, N. Z.** and **Zhidkov, V. G.**) [Transl. from Russ.], 17.8–687

Kharchenko, S. I.

Total evaporation from the soil in a zone of deficient moisture and a method of its calculation (*with* **Kharchenko, K. I.**) [Transl. from Russ.], 17.9–339

Kharitonov, A. V.

Nocturnal spectral transmittance at the astrophysical Institute of AN KazSSR [Transl. from Russ.], 17.4–281

Khlopushin, G. A.

Weather forecasting in the Lazarev station region [Transl. from Russ.], 17.5–138

Khmelevskaia, L. V.

On the temperature regime of the Norwegian and Greenland Seas [Transl. from Russ.], 17.4–689

Khmelevtsov, S. S.

Aerosol sampling trap for curvilinear streams [Transl. from Russ.], 17.1–114

Khodzibaev, N. N.

Factors forming the hydrochemical regime of ground waters in the lower Amu-Dar'ya (*with* **Salimova, G. N.**) [Transl. from Russ.], 17.8–747

Khrabrov, Iu. B.

Composite method and the problem of long-period weather forecasting (*with* **Reshetov, V. D.**) [Transl. from Russ.], 17.10–193

Kibel', Ivan Afanas'evich

Determination of the limits of cloud cover [Transl. from Russ.], 17.9–356

Hydrodynamics of cloud systems [Transl. from Russ.], 17.6–396; 17.9–352

Kiriukhin, B. V.

Accommodation coefficient of ice (*with* **Plaude, N. O.**) [Transl. from Russ.], 17.5–316

Klenova, M. V.

Some results of investigations of suspended matter in the Atlantic and in the southern part of the Indian Ocean [Transl. from Russ.], 17.6–695

Klinov, F. Ia.

Measurement of the temperature in the bottom 300-meter atmospheric layer on the upper air [i.e., tall] mast (*with* **Andreev, V. D.**) [Transl. from Russ.], 17.7–148

Measurement of the wind velocity in the bottom 300-meter atmospheric layer on an upper air [i.e., tall] meteorological mast (*with* **Poltavskiĭ, V. V.**) [Transl. from Russ.], 17.7–152

Kniazev, G. S.

Double vertical photographic wave meter [Transl. from Russ.], 17.5–698

Koblents, Ia, P.

Changes in the mapped position of the Lazarev Ice Shelf (*with* **Leont'ev, E. B.**) [Transl. from Russ.], 17.5–772

Kochin, N. E.

Theoretical hydromechanics (*with* **Kibel', I. A.** and **Roze, N. V.**) [Transl. from Russ.], 17.11–3

König, Herbert L.

Environmental effects of atmospheric electric processes of very low frequency [Transl. from German], 17.7–63

Kogan, R. M.

Determination of water equivalent of snow cover by method of aerial gamma-survey (*with others*) [Transl. from Russ.], 17.8–452

Kolesnikov, A. G.

Methods of calculating the glaciation of seeded supercooled clouds (*with* **Beliaev, V. I.**) [Transl. from Russ.], 17.5–152

Theory of the glaciation of a supercooled, homogeneous water cloud (*with* **Beliaev, V. I.**) [Transl. from Russ.], 17.5–354

Kolesnikova, V. N.

Spectra of meteorological field fluctuations (*with* **Monin, A. S.**) [Transl. from Russ.], 17.3–192

Kol'man, O. V.

Oceanography in Japan [Transl. from Russ.], 17.10–646

Kolobov, N. V.

Characteristics of atmospheric circulation by a macro-vorticity method [Transl. from Russ.], 17.8–300

Kolosov, M. A.

Radiowave propagation in interplanetary and circumsolar space (*with* **Iakovlev, O. I.** and **Efimov, A. I.**) [Transl. from Russ.], 17.10–72

Komarov, N. N.

Methods of measuring the ionization of the free atmosphere and some resulting data [Transl. from Russ.], 17.6–133

Kondrat'ev, I. Ia.

Infrared absorption spectrum of water in its liquid state (*with others*) [Transl. from Russ.], 17.3–273

Kondrat'ev, K. Ia.

Interpretation of radiation data from meteorological satellites [Transl. from Russ.], 17.10–137

Investigating the spectral distribution of shortwave radiation (*with others*) [Transl. from Russ.], 17.3–265

Spectral distribution of outgoing radiation (*with* **Iakushevskaia, K. E.**) [Transl. from Russ.], 17.3–276

Thermal radiation of CO_2 in the atmosphere (*with* **Niĭlisk, Kh. Iu.**) [Transl. from Russ.], 17.3–281

Koniakhina, A. A.
Effect of non-linearity in a problem of slope winds (numerical experiment) (*with* **Shaposhnikova, M. I.** and **Gutman, L. N.**) [Transl. from Russ.], 17.3–319

Konovalov, G. V.
Meteorological observations in the mountains of Queen Maud Land [Transl. from Russ.], 17.5–74

Konstantinov, A. R.
Analysis of bases of the Prandtl-Karman semi-empirical theory from the point of view of the structure of turbulent pulsations in the surface layer of the atmosphere [Transl. from Russ.], 17.12–321

Koo, Chen Chao
Problem of single weather station to report location of thunder lightning activities [Transl. from Chinese], 17.12–105

Kopanev, I. D.
Thermal characteristics of snow in Antarctica [Transl. from Russ.], 17.5–394

Koprova, L. I.
Thermal radiation emission from a spherical atmosphere (*with* **Malkevich, M. S.**) [Transl. from Russ.], 17.2–231

Korneva, L. A.
Energy of an irregular attenuating sea swell and wave energy losses by turbulent friction [Transl. from Russ.], 17.5–758
Experimental study of the steepness of wind-generated waves [Transl. from Russ.], 17.5–757
Results of observations and methodological investigations at the remote-recording hydrometeorological station of the Black Sea branch of the Marine Hydrophysical Institute during the IGY and IGC (*with* **Shutova, E. N.**) [Transl. from Russ.], 17.5–75
Statistical characteristics of waves in a deep sea and in the ocean (*with* **Liverdi, V. P.**) [Transl. from Russ.], 17.4–694

Korotin, A. B.
Comparison of diurnal variations of frequency of appearance of hydrogen emission and radio reflections on 72 megacycles [Transl. from Russ.], 17.5–500
On a possible mechanism of generation of magnetic disturbances (*with* **Pudovkin, M. I.**) [Transl. from Russ.], 17.5–537
On the relation of integral brightness of aurorae to geomagnetic field variations and short-period oscillations of Earth currents [Transl. from Russ.], 17.5–463
Zone of intrusion of the corpuscular flux and the spiral distribution of the maximum perturbation time [Transl. from Russ.], 17.4–571

Korshunov, Iu. S.
Oblique wave photography with a single aerial survey camera from an airplane [Transl. from Russ.], 17.4–673

Koshliakov, M. N.
Some results of measurements and calculations of zonal currents in the Pacific equatorial region (*with* **Neĭman, V. G.**) [Transl. from Russ.], 17.8–675

Kosourov, G. I.
Long-lived beta activity of the atmosphere over the Atlantic Ocean in 1960 (*with* **Ushakova, N. P.**) [Transl. from Russ.], 17.3–217

Kostianoĭ, G. N.
Connection between ascending terrestrial and tropospheric infrared radiation flux and mean-energy temperature levels [Transl. from Russ.], 17.3–285

Kotel'nikov, V. A.
Radar observations of Venus in the Soviet Union in 1964 (*with others*) [Transl. from Russ.], 17.8–610

Kozharin, V. S.
Moisture balance and dynamics of a cloud during artificial modification [Transl. from Russ.], 17.5–153

Kozlov, V. F.
On the theory of the thermal oceanic boundary layer at the equator [Transl. from Russ.], 17.4–677

Kozlova, K. I.
Changes in the color of Mars based on photoelectric observations of 1958 (*with* **Glagolevskiĭ, Iu. V.**) [Transl. from Russ.], 17.11–660
Color excesses and color indices of several craters on the Moon, based on photoelectric photometry (*with* **Glagolevskiĭ, Iu. V.**) [Transl. from Russ.], 17.11–649
Preliminary results of astroclimatic investigations in Kazakhstan [Transl. from Russ.], 17.3–282

Kozyrev, M. A.
Correlation functions and spectral density of the amplitudes of pitching of the research vessel "Mikhail Lomonosov" [Transl. from Russ.], 17.5–756

Krasil'nikov, D. D.
Dependence of the separation curve on the mean size of an extensive air shower (*with others*) [Transl. from Russ.], 17.4–530
Effect of a light cover on the frequency of recorded extensive air showers (*with others*) [Transl. from Russ.], 17.4–531
Method of allowing for geometric effects in the EAS frequency variations near sea level [Transl. from Russ.], 17.4–532
On the relation between the magnitude of an ionization burst and the size of a shower in high-pressure chambers [Transl. from Russ.], 17.4–533

Electromechanical recording wave period-amplitude analyzer (*with* **Zhirkov, A. V.**) [Transl. from Russ.], 17.4–674

Levin, L. M.
Coagulation of cloud drops by turbulence and gravity (*with* **Sedunov, Iu. S.**) [Transl. from Russ.], 17.11–384
Influence of inertia on the settling of flowing aerosol particles at subcritical Stokes numbers (*with* **Sedunov, Iu. S.**) [Transl. from Russ.], 17.9–306

Link, František
On the importance of increased diffusion during twilight (*with* **Neužil, Luděk** and **Zacharov, Igor**), 17.7–480

Lipskiĭ, Iu. N.
Zond-3 photographs of the Moon's far side [Transl. from Russ.], 17.2–522

Livshits, G. Sh.
Determination of the atmospheric scattering function for light allowing for multiple scattering and pure absorption [Transl. from Russ.], 17.1–417
Intensity of scattered atmospheric radiation [Transl. from Russ.], 17.1–270

Loginov, G. A.
Results obtained from investigations of the S_D-variations in high latitudes [Transl. from Russ.], 17.4–558

Lominadze, V. P.
Influence of mountains on atmospheric humidity (*with* **Khrgian, A. Kh.**) [Transl. from Russ.], 17.9–332

Maeda, Ken-ichi
ISQY and the space rocket: observations during the ISQY [Transl. from Jap.], 17.1–35
Observation of the propagation mode of low frequency radio wave and noise in the ionosphere by K-8-11 type space rocket (*with* **Kimura, Iwane** and **Takagura, Tatsuo**) [Transl. from Japanese], 17.1–458
Results of the observation of temperature and wind in the upper atmosphere, Report No. 2 (*with others*) [Transl. from Japanese], 17.1–289

Makarova, T. T.
Forecast computations of minimum stages of the Lena River in the summer period [Transl. from Russ.], 17.1–146

Makhotkin, L. G.
Characteristics of atmospheric electricity in fogs (*with* **Solov'ev, V. A.**) [Transl. from Russ.], 17.5–452

Maklakov, I. A.
  Correlation between the height of the lower boundary of the tropopause and the temperature of the troposphere [Transl. from Russ.], 17.8–240
Maksimov, I. V.
  Contribution to the study of the causes of long-period variations in the activity of the Gulf Stream (*with* **Smirnov, N. P.**), [Transl. from Russ.], 17.8–676
Maksimov, V. A.
  Computing runoff produced by a heavy rainstorm with a moving center [Transl. from Russ.], 17.3–366
  Outstanding rainstorm in the Donbas [Transl. from Russ.], 17.3–367
Malkevich, M. S.
  Angular and spectral variation of radiation reflected by the Earth into outer space [Transl. from Russ.], 17.10–306
  Determining temperature and moisture of the Earth's atmosphere based on satellite measurements of the Earth's atmosphere (*with* **Tatarskiĭ, V. I.**) [Transl. from Russ.], 17.10–330
  Horizontal scattered-radiation fluxes [Transl. from Russ.], 17.1–271
  Satellite meteorology [Transl. from Russ.], 17.10–139
Mal'ko, L. N.
  Some features of the latitude drift of polar aurorae [Transl. from Russ.], 17.4–511
Mamaev, O. I.
  Water masses of the North Atlantic and their interaction [Transl. from Russ.], 17.2–629
Marchuk, G. I.
  Expansion with respect to a small parameter of solutions of a system of hydrothermodynamic equations as applied to atmospheric processes (*with* **Kireeva, N. M.**) [Transl. from Russ.], 17.10–180
  Numerical algorithm for solution of weather forecasting equations [Transl. from Russ.], 17.2–125
  Numerical forecasting of weather on a sphere [Transl. from Russ.], 17.2–124
  Numerical methods for solving weather-forecasting and climate-theory problems, Pt. 1 [Transl. from Russ.], 17.9–2
Markov, M. N.
  Study of the angular radiation distribution of the Earth and the Earth's atmosphere from geophysical rockets and balloons (*with* **Merson, Ia. I.** &and **Shamilev, M. R.**) [Transl. from Russ.], 17.10–314
  Upper atmosphere layers which radiate in the infrared spectral region (*with* **Merson, Ia. I.** and **Shamilev, M. R.**), 17.10–316
Marov, M. Ia.
  Density of the upper atmosphere in years of minimum solar activity [Transl. from Russ.], 17.2–152
  Dynamic nature of atmospheric density : altitudes of 200–300 km [Transl. fro Russ.], 17.11–228
Martsinkevich, L. M.
  Geostrophic currents in the northwest pa of the Sargasso Sea and neighboring se tion of the Gulf Stream [Transl. fro Russ.], 17.3–670
Mashkova, G. B.
  Atmospheric stratification characteristics i inversions [Transl. from Russ.], 17.7–29
Maslovskiĭ, P. I.
  Accelerometer for measuring the vertica accelerations of a ship (*with* **Ptushkin, C I.**) [Transl. from Russ.], 17.4–668
Matushevskiĭ, G. V.
  Calculation of the two-dimensional energ spectrum according to stereo photographi data (*with* **Strekalov, S. S.**) [Trans from Russ.], 17.2–645
Matveev, L. T.
  Formation and development of cloud [Transl. from Russ.], 17.5–357
  Theory of the diurnal variation of the win speed in the boundary layer of the atmo sphere [Transl. from Russ.], 17.12–360
Mayaud, P.-N.
  Principles of a discrimination between S and SD on individual records and descrip tion of a special type of magnetic dis turbance, the "slow oscillation" [Transl from French], 17.12–580
Mazurin, N. I.
  Synoptic conditions for the formation o cirrostratus and ultra-cirrus [Transl. fro Russ.], 17.5–358
Mednikov, Evgenii Pavlovich
  Acoustic coagulation and precipitation o aerosols [Transl. from Russ.], 17.2–27
Medzhitov, R. M.
  Use of a hydrograph for registering dew point deficit (depression) and forecasting the time of formation and dispersal o radiation and adjective-radiation fogs a airfields [Transl. from Russ.], 17.8–168
Megrelishvili, T. G.
  Study of the Earth's atmosphere by the twilight method at the Abastumani Astrophysical Observatory [Transl. from Russ.] 17.1–421
Melent'eva, I. I.
  On certain law-governing principles of the boundary layer of the atmosphere obtained from an analysis of experimental data [Transl. from Russ.], 17.12–205
Mel'nichuk, Iu. V.
  Some problems of radar measurement of wind variations in the troposphere [Transl. from Russ.], 17.8–117
[Mezhduvedomstvennaia Konferentsiia po Voprosam Issledovaniia Oblakov i Grosovogo Elektrichestva, 6th, June 1959]

Studies of clouds, precipitation, and thunderstorm electricity [Transl. from Russ.], 17.3–24

Mikhaĭlovskaia, V. V.
Theory of measuring the size of raindrops by the acoustic method [Transl. from Russ.], 17.4–85

Mikhnevich, V. V.
Density and temperature of the atmosphere based on measurement results obtained on high altitude geophysical automatic stations in 1963 [Transl. from Russ.], 17.10–125

Minervin, V. E.
Liquid-water content of clouds, according to station network data, 17.5–359

Minina, L. S.
Fluctuation of the tropopause height in relation to the temperature variations in the troposphere and lower stratosphere (*with* Maklakov, I. A.) [Transl. from Russ.], 17.8–241

Mirkotan, S. F.
Irregularity structure and movement in the ionosphere (selected passages) (*with* Kushnerevskiĭ, Iu. V.) [Transl. from Russ.], 17.9–443

Mironov, A. V.
Some results of the processing of electrophotometric observations of airglow [Transl. from Russ.], 17.5–505

Misiura, V. A.
Certain results of ionosphere studies using artificial Earth satellites and geophysical rockets (*with others*) [Transl. from Russ.], 17.10–501

Miyazaki, Yukio
Measurement of cosmic radiation by Kappa 8, No. 11 rocket (*with others*) [Transl. from Japanese], 17.1–487

Moiseev, N.
On the Hilden-Moulton hypothesis of the origin of Gegenschein [Transl. from Russ.], 17.5–637

Molchanov, A. P.
Use of radio data to determine the position of the region in which the characteristics of the solar atmosphere change rapidly [Transl. from Russ.], 17.8–595

Molchanov, I. V.
Some problems of typology and classification of ice cover on lakes and reservoirs [Transl. from Russ.], 17.2–668

Monakhov, F. I.
Utilization of long-period microseisms to obtain information concerning storms in the ocean [Transl. from Russ.], 17.4–228

Monin, A. S.
Structure of the wind-velocity and temperature fields in the atmospheric surface boundary layer [Transl. from Russ.], 17.9–303

Morgunov, S. P.
Evaluation of artificial-modification efficiency from the polarization characteristics of the echo signal (*with* Shupiatskiĭ, A. B.) [Transl. from Russ.], 17.12–190

Morozhenko, N. N.
Study of the physical properties of prominences with metallic lines [Transl. from Russ.], 17.1–571

Morskoĭ, G. I.
Mexican cyclones [Transl. from Russ.], 17.4–229

Muchnik, V. M.
Approximate evaluation of the yield of water from cumulonimbus clouds [Transl. from Russ.], 17.5–360

Muliarchik, T. M.
Variations in the soft component of the electron energy spectrum [Transl. from Russ.], 17.10–572

Musaelian, Sh. A.
Humidity forecasting [Transl. from Russ.], 17.10–199

Mushenko, P. M.
Consideration of the accuracy of the upper-air [i.e., high] mast thermogradientograph [Transl. from Russ.], 17.7–149

Myslovski, Mechislav
Committee on Marine Investigation at the Polish Academy of Sciences [Transl. from Russ.], 17.10–645

Nadubovich, Iu. A.
Automatic frame-by-frame photometry of all-sky photographs [Transl. from Russ.], 17.6–518

Natrus, A. A.
On the subject of evaluation of precipitation as a component of the water balance of reservoirs and lakes [Transl. from Russ.], 17.2–316

Nazarova, T. N.
Study of meteoric matter [Transl. from Russ.], 17.10–621

Nesterov, V. E.
Radiation safety problems in space flights (*with others*) [Transl. from Russ.], 17.11–68
Study of the inner and artificial radiation zones of the Earth at low altitudes in 1960–1964 (*with others*) [Transl. from Russ.], 17.10–555

Neuĭmin, G. G.
Some results of optical investigation in the North Atlantic (*with others*) [Transl. from Russ.], 17.3–652

Nikandrov, V. Ia.
Basic processes involved in the phase transformations of atmospheric water during artificial dry-ice modification of supercooled clouds and fogs [Transl. from Russ.], 17.5–150

Nikitin, M. M.
  Deep currents of the Arctic Basin (*with* **Dem'ianov, N. I.**) [Transl. from Russ.], 17.8–677
Nikitina, N. M.
  Preliminary results of the Earth current observations at the Barentsburg-Station, Spitzbergen [Transl. from Russ.], 17.5–525
Nikitinskaia, N. I.
  Experimental investigation of the variation of the spectral transmittance coefficient P_λ of the atmosphere [Transl. from Russ.], 17.1–273
Novikov, S. M.
  Computation of the water-level regime of undrained upland swamps from meteorological data [Transl. from Russ.], 17.3–707
Novosel'tsev, E. P.
  Attenuation of total radiation in upper clouds [Transl. from Russ.], 17.2–226
  Spectral reflectivity of clouds [Transl. from Russ.], 17.2–217
Novoshilov, N. I.
  Turbulence inversion is the result of mesojet action [Transl. from Russ.], 17.10–318

Obashev, S. O.
  Surges in the solar atmosphere [Transl. from Russ.], 17.9–599
Okhatsimskaia, M. V.
  Regularities in the excitation of short-period pulsations in the middle latitudes (*with others*) [Transl. from Russ.], 17.5–541
Ol', A. I.
  Relationship of the cosmic ray intensity to the magnetic activity and radio emission of the Sun (*with* **Tiasto, M. I.**) [Transl. from Russ.], 17.4–543
  Variation of cosmic ray intensity during magnetic storms with sudden and gradual beginnings [Transl. from Russ.], 17.4–544
Onufrienko, L. G.
  Losses of snowmelt on slopes [Transl. from Russ.], 17.3–723
Orlenko, L. R.
  Determining vertical currents in the boundary layer on the basis of external parameters [Transl. from Russ.], 17.11–374
Orlov, V. P.
  Forecast of the displacement of the South Geomagnetic Pole [Transl. from Russ.], 17.7–635
Ovchinnikov, I. M.
  Sixth Mediterranean Expedition of the research vessel Akademik Sergeĭ Vavilov [Transl. from Russ.], 17.8–678
Ozmidov, R. V.
  Some features of the energy spectrum of oceanic turbulence [Transl. from Russ.], 17.10–689

Panchenko, Iu. M.
  Asymptotic form of the trail of a bod moving in a rarefied plasma [Trans from Russ.], 17.12–58
Panfilova, S. G.
  Latitude-mean values of water temperatur and salinity in the Pacific [Transl. fro Russ.], 17.9–660
Paramonov, A. N.
  Distribution pattern of suspended matter i the Black Sea: some measurement result [Transl. from Russ.], 17.8–655
Paramonov, N. A.
  Unitary vertical conduction currents as measure of thunderstorm activity for th entire surface of the Earth [Transl. fro Russ.], 17.4–239
Pashova, L. T.
  Calculation of average snow storage in basin allowing for snow accumulation in th forest [Transl. from Russ.], 17.10–435
Patin, S. A.
  Possibilities of using tritium for the stud of dynamic processes in the ocean and i the atmosphere [Transl. from Russ.] 17.5–158
Pavlov, V. E.
  Self-recording photoelectric daylight photom eter and the atmospheric scattering functio for light, including small scattering angle [Transl. from Russ.], 17.3–283
Pelevin, V. S.
  Problems of snowdrifts around buildings i Antarctica [Transl. from Russ.], 17.5–398
Perevertun, M. P.
  Back scattering of twilight at arbitrar points of the sky [Transl. from Russ.] 17.11–470
  Optical properties of certain plant specie in the infrared region of the spectrum i transmitted light [Transl. from Russ.] 17.11–638
  Visual observations of Mars in 1958 [Transl from Russ.], 17.11–661
Petrov, G. D.
  In-flight measurement of cloud-particl charges [Transl. from Russ.], 17.5–462
P'iankov, V. P.
  Mammoths and a climatic paradox [Transl. from Russ.], 17.11–447
Piao, Ch'en
  Research on solar activities [Transl. from Chinese], 17.12–659
Piaskovskaia-Fesenkova, E. V.
  Atmospheric polarization allowing for multi- ple scattering [Transl. from Russ.], 17.1– 429
  Development of atmospheric optics in Kaza- khstan [Transl. from Russ.], 17.1–416
  Effective sky luminance layer [Transl. from Russ.], 17.1–274
  Some sky-luminance data [Transl. from Russ.], 17.1–275

Pinus, N. Z.
Basic principles for the automation of the analysis of aircraft meteorological information (*with others*) [Transl. from Russ.], 17.8–102
Studies in physics of the free atmosphere (*with* **Shmeter, S. M.**) [Transl. from Russ.], 17.12–2

Pivovarov, A. A.
Effect of solar radiation penetrating into the sea in forming the water temperature [Transl. from Russ.], 17.8–654

Plaude, N. O.
Production of snow crystals by the freezing of supercooled water droplets (*with* **Molotkova, I. A.**) [Transl. from Russ.], 17.5–392

Pletnev, V. D.
Penetration processes into the magnetosphere of the Earth, capture and acceleration of solar stream particles, and their role in the dynamics of the geomagnetic trap (*with others*) [Transl. from Russ.], 17.10–573

Pogosian, Kh. P.
Air envelope of the Earth [Transl. from Russ.], 17.2–3
Influence of tropospheric processes on changes in the temperature field and circulation in the stratosphere [Transl. from Russ.], 17.4–225

Pokrovskaia, T. V.
On the possibilities of long-range synoptic-climatological forecasts [Transl. from Russ.], 17.8–211
On the question of the influence of the underlying surface on the formation of anomalies of temperature over the European Territory of the U.S.S.R. in the spring months (*with* **Spirina, L. P.** and **Sudist, A. P.**) [Transl. from Russ.], 17.7–293

Pokrovskii, G. L.
Possible explanation of meteor explosions [Transl. from Russ.], 17.9–574

Ponomarenko, G. P.
Study of the North Atlantic current from IGY data [Transl. from Russ.], 17.5–745

Preobrazhenskiĭ, L. Iu.
Some features of the distribution of water temperature in the surface layer [Transl. from Russ.], 17.2–617

Priebsch, Josef
Distribution of radioactive substances in the free atmosphere [Transl. from German], 17.7–220

Prikhot'ko, G. F.
Approximate criterion for determining the possibility of inducing artificial precipitation from cumulus clouds in the Ukrainian SSR [Transl. from Russ.], 17.10–218

Prokhorov, P. S.
Investigation of the diffusion forces between water droplets and non-volatile particles (*with* **Leonov, L. F.**) [Transl. from Russ.], 17.5–362

Pshenai-Severin, S. V.
Rate of decrease of fog droplet concentration in an acoustic field due to hydrodynamic forces and orthokinetic coagulation [Transl. from Russ.], 17.7–192

Pudovkin, M. I.
Determination of the parameters of the disturbed ionosphere in the zone of polar aurorae [Transl. from Russ.], 17.4–493
Diurnal march of ionospheric wind velocity in the zone of polar aurorae with S_D-variation [Transl. from Russ.], 17.4–494

Pupkov, V. N.
Formation, distribution, and variation of snow cover on the Asiatic territory of the U.S.S.R. [Transl. from Russ.], 17.2–307

Pushkarev, V. F.
Evaporation from the land's surface according to data of hydrometeorological stations which carried out observations in accordance with the IGY program (*with* **Gridasova, T. V.**) [Transl. from Russ.], 17.1–338

Raizer, Iu. P.
Shock wave propagation in a nonhomogeneous atmosphere in the direction of decreasing density [Transl. from Russ.], 17.8–84

Rakhmanina, A. T.
Transpjiration of plants in certain east European wooded tundra communities [Transl. from Russ.], 17.10–61

Reshetov, V. D.
On the mechanism of electricity generation in thunderstorms [Transl. from Russ.], 17.8–485

Riazanova, L. A.
Processes in the stratosphere based on rocket sounding data (*with* **Khvostikov, I. A.**) [Transl. from Russ.], 17.4–316

Roldugin, V. K.
Orientation of homogeneous arcs of polar aurorae and their correlation with the currents of magnetic disturbances (*with* **Starkov, G. V.**) [Transl. from Russ.], 17.4–512

Rozenberg, G. V.
Some possibilities of experimental determination of the true absorption spectra of clouds and fogs [Transl. from Russ.], 17.5–346

Rudometov, M. V.
Long-range forecast of critical dates of the spring discharge hydrograph from local indices of atmospheric circulation [Transl. from Russ.], 17.3–161
On the question of local indices of atmospheric circulation used for hydrologic forecasts [Transl. from Russ.], 17.3–234

Ruzin, M. I.
Vertical profile of the coefficient of turbulence in the boundary layer of the atmosphere [Transl. from Russ.], 17.12–322

Rymsha, V. A.
Investigations and calculations of freezing of rivers and reservoirs (*with* **Donchenko, R. V.**) [Transl. from Russ.], 17.12–736

Sabinin, K. D.
Short-period internal waves of the Norwegian Sea (*with* **Shulepov, V. A.**) [Transl. from Russ.], 17.8–679

Sachkova, A. I.
Machine data processing of ships' surface observations, 17.1–77

Sal'man, E. M.
Properties of the radar echo in sounding of Cu clouds of small vertical extent (*with* **Brylev, G. B.**) [Transl. from Russ.], 17.9–116
Relation between the thermodynamic state of the atmosphere and radar echoes from a clear sky (*with* **Brylev, G. B.**) [Transl. from Russ.], 17.9–117

Salomonovich, A. E.
Concerning the detection of water in the atmosphere of Venus [Transl. from Russ.], 17.9–564

Samarin, V. G.
Characteristics of some mechanical laboratory installations for producing impulse pressures in water (*with* **Tsyplukhin, V. F.**) [Transl. from Russ.], 17.5–681
Theoretical study of pressure sensors with capillary filters [Transl. from Russ.], 17.1–598

Samburenko, I. Z.
Contribution to the problem of studying the radioactivity of inland waters [Transl. from Russ.], 17.4–187

Samoĭlenko, V. S.
Reality of air and water masses [Transl. from Russ.], 17.8–686

Schatzman, Evry
Origin and evolution of the universe [Transl. from French], 17.10–7

Schmitz, Wolfgang
Measurement of mean temperature on a reaction velocity basis with the polarimeter and its use in climatology and ecology, especiallly in hydrology and forestry (*with* **Volkert, Erik**) [Transl. from German], 17.10–319

Schurer, M.
Rocketsonde wind measurements up to the mesopause in Sardinia (*ed.*) [Transl. from Russ.], 17.12–365

Sedunov, Iu. S.
Fine cloud structure and its role in the formation of the cloud particle spectrum [Transl. from Russ.], 17.3–352

Sekerzh-Zen'kovich, Ia. I.
Standing sectoral waves of finite amplitude at the surface of a spherical fluid layer [Transl. from Russ.], 17.1–652
Three-dimensional standing waves of finite amplitude at the surface of a fluid of infinite depth [Transl. from Russ.], 17.1–651

Sekerzh-Zen'kovich, T. Ia.
Propagation of a free tidal wave in a channel of variable depth [Transl. from Russ.], 17.1–641
Symmetrical oscillations of two layers of fluid covering a sphere and rotating at various angular velocities [Transl. from Russ.], 17.1–221

Selezneva, E. S.
Aerological characteristics of convective clouds over certain regions [Transl. from Russ.], 17.5–364
Distribution of condensation nuclei in the atmosphere on days with convective clouds [Transl. from Russ.], 17.5–337

Semenenko, A. D.
Optical properties of etiolated oats [Transl. from Russ.], 17.11–637
Optical properties of various species of wheat [Transl. from Russ.], 17.11–635
Spectral brightness of the wheat leaf and spike [Transl. from Russ.], 17.11–636

Sergeev, A. V.
Operation of SNM-8 counters at voltages up to 3 kV (*with* **Luzov, A. A.**) [Transl. from Russ.], 17.4–545

Sergeev, V. A.
Wave period-amplitude analyzer (*with* **Tsyplukhin, V. F.**) [Transl. from Russ.], 17.4–675

Serikov, M. I.
Density and salinity of Antarctic sea ice [Transl. from Russ.], 17.5–782

Serlapov, S. T.
Jet streams at high latitudes in Antarctica [Transl. from Russ.], 17.11–367
Relationship of some geophysical processes in Central Antarctica to weather variations [Transl. from Russ.], 17.10–173

Sgibneva, L. A.
Theory of tides in a fluid with friction (*with* **Fel'zenbaum, A. I.**) [Transl. from Russ.], 17.11–748

Shafer, Iu. G.
Cosmic-ray intensity in the atmosphere up to a height of 500 km (*with others*) [Transl. from Russ.], 17.2–437
"Day-night" effect in the cosmic ray intensity from measurements in the stratosphere [Transl. from Russ.], 17.4–546
Effect of magnetic storms in the intensity of cosmic rays according to measurements in the stratosphere (*with* **Sokolov, V. D.**) [Transl. from Russ.], 17.4–547

Seasonal effect in the intensity of cosmic rays deduced from measurements in the stratosphere (*with* **Sokolov, V. D.**) [Transl. from Russ.], 17.4–548
Some results of measurements of east-west asymmetry in the intensity of primary cosmic radiation (*with others*) [Transl. from Russ.], 17.2–438

Shafrin, Iu. A.
On the large scale turbulent transport and meridional circulation of ozone [Transl. from Russ.], 17.3–200

Shapalova, T. I.
Study of solar radiation falling on school buildings [Transl. from Russ.], 17.12–279

Shapiro, N. B.
Analysis of wind-current relationships in the equatorial zone of the ocean [Transl. from Russ.], 17.11–355

Sharonov, V. V.
Climatology of noctilucent clouds according to observations performed during the IGY [Transl. from Russ.], 17.4–440

Shchekin, A. E.
Calibration of radiosondes at temperatures to minus 100°C [Transl. from Russ.], 17.1–108

Shefov, N. N.
Populations of hydroxyl molecule vibrational levels [Transl. from Russ.], 17.5–506

Shekhter, F. N.
Influence of radiative heat exchange on the temperature regime of the surface layer of the atmosphere [Transl. from Russ.], 17.12–300

Shekhtman, E. D.
Effect of the mountain massifs of southeastern Kazakhstan on the formation of clouds and precipitation [Transl. from Russ.], 17.5–297

Shifrin, K. S.
Calculation of the kinetics of cloud glaciation (*with* **Perel'man, A. Ia.**) [Transl. from Russ.], 17.5–365
Determining the droplet spectrum by the method of small angles (*with* **Golikov, I.**) [Transl. from Russ.], 17.5–341
Measurement of the microstructure by the method of small angles (*with* **Golikov, V. I.**) [Transl. from Russ.], 17.4–369
Tables for computing the spectrum of the particles of a dispersed system from its transparency (*with* **Perel'man, A. Ia.** and **Potekhina, L. K.**) [Transl. from Russ.], 17.2–227
Theory of short wave radiation fluxes in the real atmosphere (*with others*) [Transl. from Russ.], 17.5–247

Shil'nikov, V. I.
Ice pack in the region of the Balleny Islands [Transl. from Russ.], 17.5–783

Shishkin, N. S.
Investigation of the dissipation of convective clouds [Transl. from Russ.], 17.5–366
Role of the coagulation of charged cloud particles in the development of thunderstorm phenomena [Transl. from Russ.], 17.4–473

Shmel'kov, A. A.
URTZ-57 aircraft dry-ice machine for dispersing supercooled clouds and fog [Transl. from Russ.], 17.5–151

Shneer, V. S.
Geomagnetic activity at Lazarev station in 1959 [Transl. from Russ.], 17.5–534

Shpak, I. S.
Method of computation of moisture content of the upper 10-centimeter layer of the soil [Transl. from Russ.], 17.3–391

Shul'gin, A. M.
Temperature regime of soils [Transl. from Russ.], 17.11–25

Shumskiĭ, P. A.
Variation in the mass of the ice cap in Central Greenland [Transl. from Russ.], 17.8–709

Shupiatskiĭ, A. B.
Radar measurement of some precipitation characteristics [Transl. from Russ.], 17.6–105

Sitnikova, M. V.
Ultraviolet radiation on the territory of Central Asia [Transl. from Russ.], 17.12–286

Skalal'skiĭ, B. G.
Features of the formation of chemical composition of the local runoff waters in the Shelon' River Basin [Transl. from Russ.], 17.12–745

Skliarov, Iu. A.
Calculation of certain errors of bolometric pyrheliometers [Transl. from Russ.], 17.2–96

Skopintsev, B. A.
Organic matter in sea water [Transl. from Russ.], 17.2–621
Some results of determinations of the iron, manganese, and copper content in the water of the Black Sea (*with* **Popova, T. P.**) [Transl. from Russ.], 17.3–659

Skripin, G. V.
Main properties of solar diurnal variations from directional cosmic-ray measurements [Transl. from Russ.], 17.4–549
Some decreases in cosmic-ray intensity (*with* **Shafer, G. V.**) [Transl. from Russ.], 17.10–536

Skrynnikov, R. G.
Short-period fluctuations in the glow intensity of polar aurorae and their association with geomagnetic pulsations (*with* **Selivanov, V. P.**) [Transl. from Russ.], 17.4–510

Volobuev, V. R.
- Ecology of soils [Transl. from Russ.], 17.4–5

Volynets, L. M.
Some results of radar measurement of precipitation per unit area (*with* **Markovich, M. L.** and **Muchnik, V. M.**) [Transl. from Russ.], 17.7–124

Vorob'ev, V. N.
Magnitude of mass and heat transport through Drake Passage (*with* **Gindysh, B. V.**) [Transl. from Russ.], 17.10–691

Vorontsov, P. A.
Structure of air flow in the lower 0.5-kilometer layer [Transl. from Russ.], 17.12–358

Voskresenskiĭ, A. I.
Microphysical characteristics of St and Sc clouds in the Arctic during the warm season (*with* **Dergach, A. L.**) [Transl. from Russ.], 17.5–370

Vsesoiuznaia Konferentsiia po Fizike Kosmicheskogo Prostranstva, 1st, Moscow, June 1965
Space research: Transactions of the All-Union Conference on Space Physics [Transl. from Russ.], 17.11–38

Vsesoiuznoe Nauchnoe Meteorologicheskoe Soveshchanie, 1st, Leningrad, 1961
Transactions of the All-Union Scientific Meteorological Conference: selected articles [of Vol. 7, Physics of the surface layer] [Transl. from Russ.], 17.12–24

Vul'fson, N. I.
Some results of the study of convective activity in the free atmosphere [Transl. from Russ.], 17.5–292
Structure of the temperature field in cumulus clouds (*with* **Ivanov, V. N.**) [Transl. from Russ.], 17.2–286
Study of convective activity in cumulus clouds [Transl. from Russ.], 17.5–293

Walden, Hans
Height and period of wave motion in the northern North Atlantic Ocean [Transl. from German], 17.2–647
Properties of sea waves in the North Atlantic Ocean: statistics of a 10-year period of sea state observations by the North Atlantic weather ships [Transl. from German], 17.2–648

Wallenquist, Åke
Dictionary of astronomical terms [Transl. from Swedish], 17.7–39

Wüst, Georg
Bottom water and the vertical circulation of the Mediterranean Sea. Second contribution to the Mediterranean circulation problem [Transl. from German], 17.9–633

Yuan, Chen
Strong electric field radiosonde and analysis of results obtained in thunderclouds (*with others*) [Transl. from Chinese], 17.12–152

Zabrodskiĭ, G. M.
Experiment in atmospheric sounding with an instrumented TU-104 (*with others*) [Transl. from Russ.], 17.5–89

Zagorodnikov, A. A.
Some results of turbulence measurements by radar in a free pure atmosphere [Transl. from Russ.], 17.2–71

Zaĭtsev, A. S.
Some results of meteorological observations on Lake Valday from a specially equipped boat (*with* **Serova, N. V.**) [Transl. from Russ.], 17.2–75

Zaĭtsev, G. N.
Features of long-period variations of level and salinity in the Northern Caspian Sea [Transl. from Russ.], 17.8–646

Zaĭtsev, V. A.
Flight conditions near cumulus congestus and cumulonimbus (*with* **Ledokhovich, A. A.**) [Transl. from Russ.], 17.5–273

Zaklinskiĭ, A. B.
Maneuvering the ship at oceanographic drifting stations (*with* **Nazaretskiĭ, L. N.**) [Transl. from Russ.], 17.3–630

Zamorskiĭ, A. D.
Hailstones of crystalline shape [Transl. from Russ.], 17.5–399
Ultra-cirrus (twilight) clouds [Transl. from Russ.], 17.6–462

Zhavoronkina, T. K.
Spectrographic method for determining several trace elements in sea water [Transl. from Russ.], 17.2–623

Zhdanov, G. B.
Analysis of the angular distributions of particles created in high-energy nuclear interactions in a photographic emulsion [Transl. from Russ.], 17.3–508

Zhitnik, I. A.
Solar images in the far ultraviolet part of the spectrum (*with others*) [Transl. from Russ.], 17.2–561

Zhukovskaia, N. A.
Changes in the amplitude of the diurnal variation of cosmic ray intensity as a function of the magnetic activity (*with* **Ol', A. I.**) [Transl. from Russ.], 17.4–552

Zhupakhin, K. S.
Use of an integrator to increase the meteorological efficiency of a radar [Transl. from Russ.], 17.8–182

Zilitinkevich, S. S.
Heat conduction and moisture exchange in a turbulent atmosphere with phase transitions of moisture (*with* **Laikhtman, D. L.**) [Transl. from Russ.], 17.2–287
Non-stationary turbulent regime in the surface layer of the atmosphere [Transl. from Russ.], 17.9–290

Turbulent conditions in the surface layer of non-stationary air flow [Transl. from Russ.], 17.12–307

Znamenskiĭ, V. A.

Determination of rational distribution of sewage discharges and water intakes by means of large-scale modeling of natural bodies of water [Transl. from Russ.], 17.3–703

Zubareva, E. P.

Gigantic pulsations in the Soviet Arctic during the 1935–1956 period (*with others*) [Transl. from Russ.], 17.5–544

New method for recording Earth currents (*with* **Nadubovich, Iu. A.**) [Transl. from Russ.], 17.6–538

Preliminary results of the Earth current observations at Tiksi Bay [Transl. from Russ.], 17.5–527

Zubenok, L. I.

Determination of evaporation from a land surface [Transl. from Russ.], 17.10–382

World maps of evaporativity [Transl. from Russ.], 17.9–342

Zubov, L. P.

On the variation of total runoff from agricultural fields: an outlook [Transl. from Russ.], 17.9–707

Zuev, V. E.

Effect of source temperature on the integral adsorption functions for long wave radiation in the surface layer of the atmosphere [Transl. from Russ.], 17.1–277

CUMULATIVE GEOGRAPHICAL INDEX

In this index of geographic places there are three major sections:

A. **Hemispheres and Regions**
B. **Continents**
C. **Oceans, Seas and Islands (Including Antarctic and Arctic)**

An alphabetical or dictionary type of arrangement is followed for all divisions and subdivisions of these major groups. For example, in Section B, the continents are arranged alphabetically as follows:

1. **Africa**
2. **Asia**
3. **Australasia (Australia, Indonesia and New Zealand)**
4. **Europe**
5. **North America**
6. **South America**

Within each continent the regions or main topographical features are listed alphabetically, followed by the countries in alphabetical order. No attempt has been made to distinguish between political and geographical regions or sub-regions.

In Section **C** the principal oceans and seas and their respective divisions have been arranged alphabetically. Islands not naturally associated with one or another of the continents have been assigned to the body of water in which they are located. Seas which fall entirely within one continent have been assigned to that continent.

Australasia includes **Australia, Indonesia,** and **New Zealand; Japan** and the **Philippines** are under **Asia; Greenland** is under **North America;** and **Iceland** is under **Europe.**

Antarctic Regions include the Antarctic continent and the bordering seas and have been arbitrarily assigned to Section **C** on **Oceans, Seas and Islands,** to preserve their analogy to the Arctic.

All references to the whole of the **U.S.S.R.** (Russia) are found in the section under **Europe.** Places definitely in the **Asiatic U.S.S.R.** (Siberia, Kazakhstan, etc.) are listed under the appropriate country or area under **Asia.**

A. HEMISPHERES AND REGIONS

NORTHERN HEMISPHERE, 17.1–226, –238, –313; 17.2–192, –193; 17.3–71, –144, –231, –254, –284, –291, –340; 17.4–90, –150, –151, –206, –292, –297, –304, –309, –314, –317, –318, –326, –327, –350, –351, –379; 17.5–135, –281; 17.6–7, –178, –238, –242, –250; 17.7–236, –287, –308; 17.8–22, –128; 17.9–334, –387; 17.10–271; 17.11–20, –167, –178, –182, –539; 17.12–372, –505

SOUTHERN HEMISPHERE, 17.1–290; 17.2–192, –193; 17.3–328; 17.4–38, –166, –167, –439; 17.6–223, –253; 17.7–262; 17.8–447; 17.9–234; 17.10–146, –333; 17.12–212

EURASIA, 17.4–168, –244, –377, –419; 17.7–247; 17.8–558; 17.11–447

POLAR REGIONS, 17.5–467, –470; 17.9–519

TROPICS, 17.2–194, –199, –203, –254, –314; 17.3–268, –302, –323, –329; 17.4–204, –205; 17.5–284; 17.6–94, –239; 17.7–432; 17.8–120, –130, –384; 17.9–233, –295; 17.12–91

B. CONTINENTS

1. AFRICA

AFRICA (general), 17.4–448; 17.5–21; 17.6–266; 17.7–288; 17.8–24; 17.9–262, –335; 17.11–455; 17.12–41

East Africa, 17.5–401; 17.7–356; 17.9–47, –261, –266; 17.10–421
  Lake Victoria, 17.3–726

Equatorial Africa, 17.1–674

North Africa, 17.8–392; 17.9–52

Northeast Africa, 17.9–395

South Africa, 17.6–281, –314

West Africa, 17.2–98; 17.11–466

METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS

MALCOLM RIGBY, Editor

Volume 17, 1966

Published monthly at Prince and Lemon Streets, Lancaster, Pa., by the AMERICAN
METEOROLOGICAL SOCIETY, 45 Beacon Street, Boston, Mass. 02108.

Printed and issued by: Lancaster Press, Inc.

TABLE OF CONTENTS

Vol. 17, 1966

Number	Month	Page	Current Abstracts item number
1	Jan.	1	16.1–1 to 16.1–687
2	Feb.	245	16.2–1 to 16.2–688
3	March	479	16.3–1 to 16.3–733
4	April	727	16.4–1 to 16.4–721
5	May	971	16.5–1 to 16.5–799
6	June	1263	16.6–1 to 16.6–820
7	July	1551	16.7–1 to 16.7–817
8	Aug.	1839	16.8–1 to 16.8–748
9	Sept.	2113	16.9–1 to 16.9–733
10	Oct.	2373	16.10–1 to 16.10–741
11	Nov.	2633	16.11–1 to 16.11–764
12	Dec.	2901	16.12–1 to 16.12–749
	Jan.–Dec.	3167	**Author and Subject Indexes**

SELECTED LIST OF SERIAL PUBLICATIONS MOST FREQUENTLY CITED IN METEOROLOGICAL AND GEOASTROPHYSICAL ABSTRACTS

ese serial publications regularly contain an abundance of material on meteorology and astrophysics. The form used in *MGA* is given below.

a Climatologica, Szeged, Hungary
a Geophysica Polonica, Warsaw
a Meteorologica Sinica, Peking
ances in Geophysics, N. Y.
ances in Space Science and Technology, N. Y.
icultural Meteorology, Amsterdam
demiia Nauk SSSR, Doklady, Ser. Matematika, izika
demiia Nauk SSSR. Izvestiia. Fizika Atmosfery i keana
demiia Nauk SSSR. Izvestiia. Fizika Zemli
demiia Nauk SSSR. Izvestiia. Ser. Geogr.
demiia Nauk SSSR. Izvestiya. Atmospheric and ceanic Physics
demiia Nauk SSSR. Institut Okeanologii, Trudy
demiia Nauk SSSR. Mezhduvedomstvennyĭ Geozicheskiĭ Komitet, Rezul'taty Issledovaniĭ po rogramme MGG [Various series]
demiia Nauk Ukrainskoĭ RSR. Morskoĭ Gidrofiziheskiĭ Institut, Trudy
erican Geophysical Union, Geophysical Monographs
erican Geophysical Union, Transactions
erican Meteorological Society, Bulletin
gewandte Meteorologie, Berlin
nales d'Astrophysique, Paris
nales de Géophysique, Paris
nali di Geofisica, Rome
hiv für Meteorologie, Geophysik und Bioklimaologie, Ser. A [and] Ser. B, Vienna
iv för Geofysik, Stockholm
ronomical Journal, New Haven, Conn.
ronomicheskiĭ Zhurnal, Moscow
rophysical Journal, Chicago
stralian Journal of Physics, Melbourne
stralian Meteorological Magazine, Melbourne
iträge zur Geophysik, Leipzig
iträge zur Physik der Atmosphäre, Frankfurt a.M.
lgaria. Institut po Khidrologiia i Meteorologiia, zvestiia
lletin de Géophysique, Montreal
nada. Meteorological Branch, Circular
nadian Journal of Physics, Ottawa
l et Terre, Brussels
l'nevostochnyĭ Nauchno-Issledovatel'skiĭ Gidrometeorologicheskiĭ Institut, Vladivostok, Trudy
utsche Hydrographische Zeitschrift, Hamburg
ance. Comité Central d'Océanographie et d'Etude des Côtes, Cahiers Océanographiques
ance. Météorologie Nationale, Monographies
ofisica et Meteorologia, Genoa
ofysiske Publikasjoner, Oslo
ograficheskoe Obshchestvo SSSR, Izvestiia
omagnetism and Aeronomy, Wash., D. C.
omagnetizm i Aeronomiia, Moscow
ophysica, Helsinki
ophysical Journal, London
ophysical Magazine, Tokyo
rmany (Federal Republic). Deutscher Wetterdienst, Berichte
rmany (Federal Republic). Deutscher Wetterdienst, Mitteilungen
eat Britain. Meteorological Office, Scientific Papers
amburg. Seewetteramt, Einzelveröffentlichungen
elsinki. Universitet. Meteorologiska Institutet, Mitteilungen
idrotehnica, Gospodărirea Apelor, Meteorologia, Bucharest
ungary. Országos Meteorológiai Intézet, Hivatalos Kiadványai
őjárás, Budapest
dian Journal of Meteorology and Geophysics, Delhi
ternational Journal of Biometeorology, Amsterdam
pan. Science Council. Ionosphere Research Committee, Report of Ionosphere and Space Research in Japan
Journal de Mécanique et de Physique de l'Atmosphère Paris
Journal de Recherches Atmosphériques, Clermont-Ferrand
Journal of Agricultural Meteorology, Tokyo
Journal of Applied Meteorology, Boston
Journal of Geomagnetism and Geoelectricity, Kyoto, Japan
Journal of Geophysical Research, Wash., D. C.
Journal of Glaciology, Cambridge, England
Journal of Hydrology, Amsterdam
Journal of Marine Research, New Haven
Journal of Meteorological Research, Tokyo
Journal of the Atmospheric Sciences, Boston
Khidrologiia i Meteorologiia, Sofia
Kiev. Ukraine. Nauchno-Issledovatel'skiĭ Gidrometeorologicheskiĭ Institut, Trudy
Kosmicheskie Issledovaniia, Moscow
Leningrad. Glavnaia Geofizicheskaia Observatoriia, Trudy
Leningrad. Gosudarstvennyĭ Gidrologicheskiĭ Institut, Trudy
Leningrad. Nauchno-Issledovatel'skiĭ Institut-Aeroklimatologii, Trudy
Limnology and Oceanography, Lawrence, Kan.
Marine Observer, London
Meteoritika, Moscow
Meteorological Magazine, London
Meteorological Monographs, Boston
Meteorological Society of Japan, Tokyo, Journal
Meteorologické Zprávy, Prague
Météorologie, Paris
Meteorologiia i Gidrologiia, Moscow
Meteorologische Rundschau, Berlin
Monthly Weather Review, Wash., D. C.
Moscow. Gosudarstvennyĭ Okeanograficheskiĭ Institut, Trudy
Moscow. Tsentral'naia Aerologicheskaia Observatoriia, Trudy
Moscow. Tsentral'nyĭ Institut Prognozov, Trudy
Nagoya. Univ. Research Institute of Atmospherics, Proceedings
Netherlands Journal of Sea Research, Den Helden
New Zealand Journal of Geology and Geophysics, Wellington
Oceanographical Society of Japan, Tokyo, Journal
Oceanography and Marine Biology, London
Okeanologiia, Moscow
Planetary and Space Science, Oxford
Problemy Arktiki i Antartiki, Leningrad
Progress in Oceanography, Oxford
Przegląd Geofizyczny, Warsaw
Pure and Applied Geophysics, Basel
Radio Science, Wash., D. C.
Reviews of Geophysics, Wash., D. C.
Rivista di Meteorologia Aeronautica, Rome
Royal Meteorological Society, London, Quarterly Journal
Rumania. Institutul Meteorologic, Bucharest, Culegere de Lucrări
Sendai, Japan. Tohoku Univ., Science Reports, 5th Ser., Geophysics
Soviet Hydrology: Selected Papers, Wash., D. C.
Space Science Reviews, Dordrecht, Holland
Sredneaziatskiĭ Nauchno-Issledovatel'skiĭ Gidrometeorologicheskiĭ Institut, Trudy
Studia Geophysica et Geodaetica, Prague
Tellus, Stockholm
Water Resources Research, Wash., D. C.
Weather, London
Weatherwise, Boston
Wetter und Leben, Vienna
World Meteorological Organization, Technical Notes
World Meteorological Organization. WMO Bulletin
Zeitschrift für Meteorologie, Berlin

TABLE OF CONTENTS

Meteorological and Geoastrophysical Abstracts

Volume 17, INDEXES, Jan.–Dec. 1966

Errata iii
